Subject: 回信: TCB Review Comments for (MXF-AP931229AG- Gemtek access point)

Dear Steve

Please see our reply as below:

-EMC-

Question #1: Are both cards identical? As observed from the internal photos, it seems both cards has same layout but slightly different in components marking.

Ans: Both cards are identical, the marking different is due to the different production time.

Question #2: A temporary shielding is used on the product, how is this going to be implemented on the final product?

Ans: A similar or equivalent solution will be incorporated into the final product and final product will be re-evaluated to make sure that final product comply with the rule.

Thanks for your assistance!

Best Regards

Wendy Liao
