Camtalk Label Example

Quick Setting

1. Plug Power & LAN cable first, wait until blue light turns on and make sure your Smartphone or Tablet is connected to the same Router (Only for configuration) .
2. Download FreePP APP from Apple Store or Google Play on your mobile device. After registration, go to Contact list and you will find the FreePP Device option on top of Contacts. Use it to search.
3. Click on the device and you can start to set it up.(Default password is 'admin')

Set Up Speed Dial Button

1. Camtalk can memorize two sets of FreePP contacts for speed dial.
2. To configure them, press video plus either button 1 or 2 simultaneously to memorize the last incoming call number for speed dialing.
3. Finally release those buttons and you will hear an alert, indicating the phone number was successfully saved.

How to Call

FreePP APP > Camtalk

1. Use the dial pad of the APP to key in the Camtalk Box ID and complete phone call.
2. Follow voice instructions to enter Security code in order to access Camtalk. (Auto or Baby Monitor mode only)

Camtalk to FreePP APP & Product

Use Phone 1 or 2 for speed dial. To configure them, call the Camtalk from your smartphone and hang up. Then, hold the Video on/off button first and press Phone 1 or 2 whichever you want to save that last phone call number. Finally release those buttons and you will hear an alert, indicating the phone number was successfully saved. Repeat same process if you want to save another number in Phone 1 or 2.

Access Camtalk without internet cable

1. Camtalk will become Access Point (AP) if no RJ45 Cable is connected to it (Around 90 seconds after boot up and when Red light is blinking)
2. Use your computer or mobile device to connect to Camtalk via wireless (SSID is Camtalk + last 6 digits of MAC)
3. Type '192.168.1.1' into your Browser to set it up (Default password is 'admin')

Real time & Scheduling Voice Message

1. Press Voice message button on APP to send a message. This also can be scheduled, sliding finger up after message is recorded.
2. The message will be reproduced 5 times. Once every 30 seconds.
3. Press Video on/off button in Camtalk to pick it up

Customize your own Ringtone

1. You can record your own Ringtone.
 2. Press Video on/off button for 3 seconds to set the last voice message as Ringtone.
- PS : MP3, 3GP, WAV formats are supported as Ringtone.

Advance Settings

For more features and options, please use the setting page via FreePP APP.
