

## Operational Description

This device is an 802.11 B/G Dual Mode minipci adapter, which operates in the 2.4GHz frequency spectrum with throughput of up to 54Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with DSSS technique will be applied.

The transmitter of the EUT is powered by host equipment. The antennas used in this EUT are Dipole antenna with MMCX jack R.A. antenna connector and Dipole antenna with IPEX MHF antenna connector.

The other instruction, please have a look at the users manual.
