Gemtek 11g LAN card)

Dear Steve

The product is designed only for Mobile exposure condition for specific application like Projector or Audio System platform as described in the user's manual. To avoid unintended application in other portable condition, the product will be completely embedded inside the end product and is not accessible to the end user. Attached please find product usage constrain declared by the applicant and revised user manual.

Thanks for your assistance!

Best Regards
Wendy Liao

TCB Review Comments for (A06-0216a- MXF-S941212G, 941125L08- Gemtek 11g LAN
card)

-EMC-

Question #1: It seems product is seeking for Mobile exposure condition for
Projector & Audio System platform as mentioned in the user's manual.

However, this product is packaged in a standard SD card format and may be reused by end-user in other portable devices like NB, PDA etc...and operating in an unauthorized condition. Please explain how this could be prevented.

Best regards,

Steve Cheng
