Subject: Re: Review of Revised Gemtek Technology Co., Ltd., FCC ID: MXF-U910327  
Application

Tim,

Here are the answers for your comment:

For item 1, please see existing data [Int Pho\_MXF-U910327-revised] on second picture of page 3 at the right corner of the bottom for P2. The card is connected to host equipment via P2.

For item 4, we confirmed that the manufacturer understands for any other antennas or connections that have not been approved.

For item 7, we have added the information to users manual as your request.

Please have a look for uploading information.

Thank you.

Rennie
