RE: GEMTEK TECHNOLOGY CO., LTD.

FCC ID: MXF-U930804G

After a review of the submitted information, I have a few comments on the above referenced Application.

Administrative Issues:

- 1) Please provide an RF exposure exhibit.
- 2) Please provide a test report for this application.
- 3) The users manual mentions installation in a notebook computer. This must CLEARLY define that this may only occur in the upper portion of the notebook screen where 20 cm from antenna to user can be maintained during use. Currently it appears that it recommends it can simply be used in any laptop.
- 4) FYI....A DoC is not relevant to this device, therefore the DoC form has not been reviewed. Additionally, the DoC label (FCC Logo) should not be placed on the device since it is not relevant. Note that although this module may be integrated into a PC peripheral, as a module it is NOT YET a PC peripheral. The integrator is responsible for performing the DoC testing.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
