RE: FCC ID: N3ESPYTRACKR70044
Attention: Juan Martinez

I have a few comments on this Application.

- 1 C63.4 states that for measurements between 30 to 1000 MHz when no bandwidth requirements are given the minimum RBW is to be 10kHz. Please explain why you used a RBW of 1 kHz in the occupied BW plot on page 21 of the report.
