Accessories

Micro USB cable

Lanyard

Clip

FQA

- 1.Why can't power on?

An: The power may run out during transportation, please charge it
before turn it on .

- 2.Why bind device failure?

An: Binding device need high quality GSM network, please keep the
device in a suitable environment.

- 3.Why can't position successfully?

An: The device should work in the open area, especially the first time.
The position speed and accuracy will be affected by the surroundings.

- 4.Why not provide adapter?

An: For two reason :①The device support the popular cell phone adapter
to charge , such as iPhone,sansumg etc.② Environmental protection
considering. Please select a suitable one for charging.

Cautions

- 1.The device only be bound by one account . an the account can
authorize the other three accounts to check the status. The authorized
accounts can check the device status and setting the parameters about
tracking, but can't change the main parameters such as APN etc..
2.Keep the product away from the fire, high temperature surroundings.
3.The function of location won't work when the power turn off or out of
GSM network.
