

2/28/08

To the Director of Certification,

Access International Inc. respectfully requests the following Class II permissive change on
Model: Dot™ Credential Tag
FCC: Identifier: N6E-433DOT07

The firmware has been modified to add beaconing capability to our Dot credential tag already certified. Beaconing will occur no faster than once every ten seconds when this mode has been enabled on the tag. No hardware modifications or changes have been made to this device.

Thank you for your attention.

Sincerely,

A handwritten signature in black ink that reads "Raj Bridgelall". The signature is written in a cursive, flowing style.

Raj Bridgelall
VP Engineering
Access International Inc.
