RE: N6SGBIR14 Class 2 Permissive Change

August 28, 2007

Dear American TCB,

In reference to the Modular Transmitter NS6GBIR14

We are seeking a FCC Class 2 Permissive change to accommodate an alternate new antenna design. We do not intend to market this antenna in Canada.

The new antenna is of the same type as previously approved but is larger in size, with slightly higher gain, and a larger read area. The antenna cable/connectors previously used are the same. No other changes have been made to the Transmitter module.

I have submitted test reports, pictures and schematics that detail the new antenna characteristics. Please let me know if you need further information.

Best Regards,

A handwritten signature in black ink, appearing to read "B Sykes".
