Certification Exhibit

FCC ID: N6SLFSQR
IC: 827B-LFSQR

FCC Rule Part: 15.209
IC Radio Standards Specification: RSS-210

ACS Project Number: 13-0072

Manufacturer: Gilbarco, Inc.
Model: LFSQR
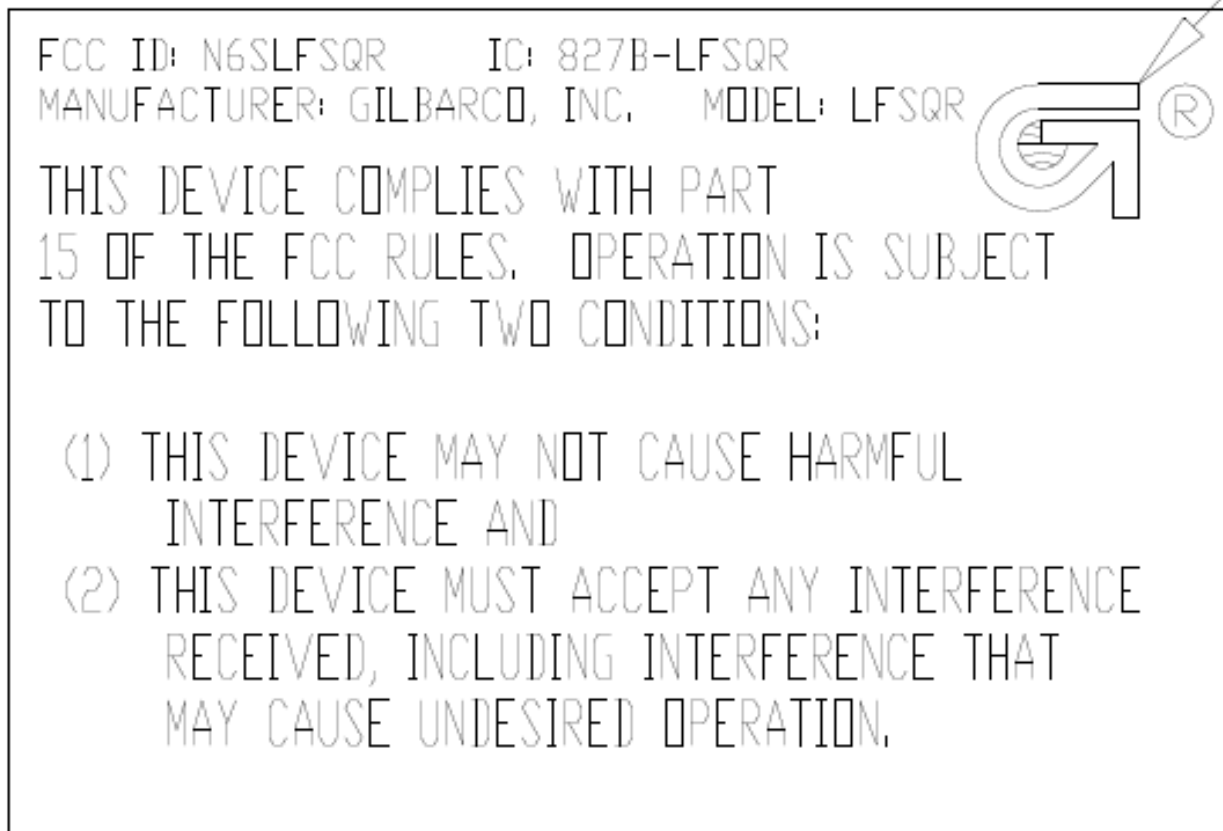

Label Information

Figure 1: Sample Label

Figure 2: Sample Host Label

Gilbarco TRIND FCC / Industry Canada Labeling information.

FCC ID: N6SLFSQR

IC: 827B-LFSQR

The Module FCC / IC label has the Gilbarco part number N23951 12A and is shown on page 2 of the drawing N23951.
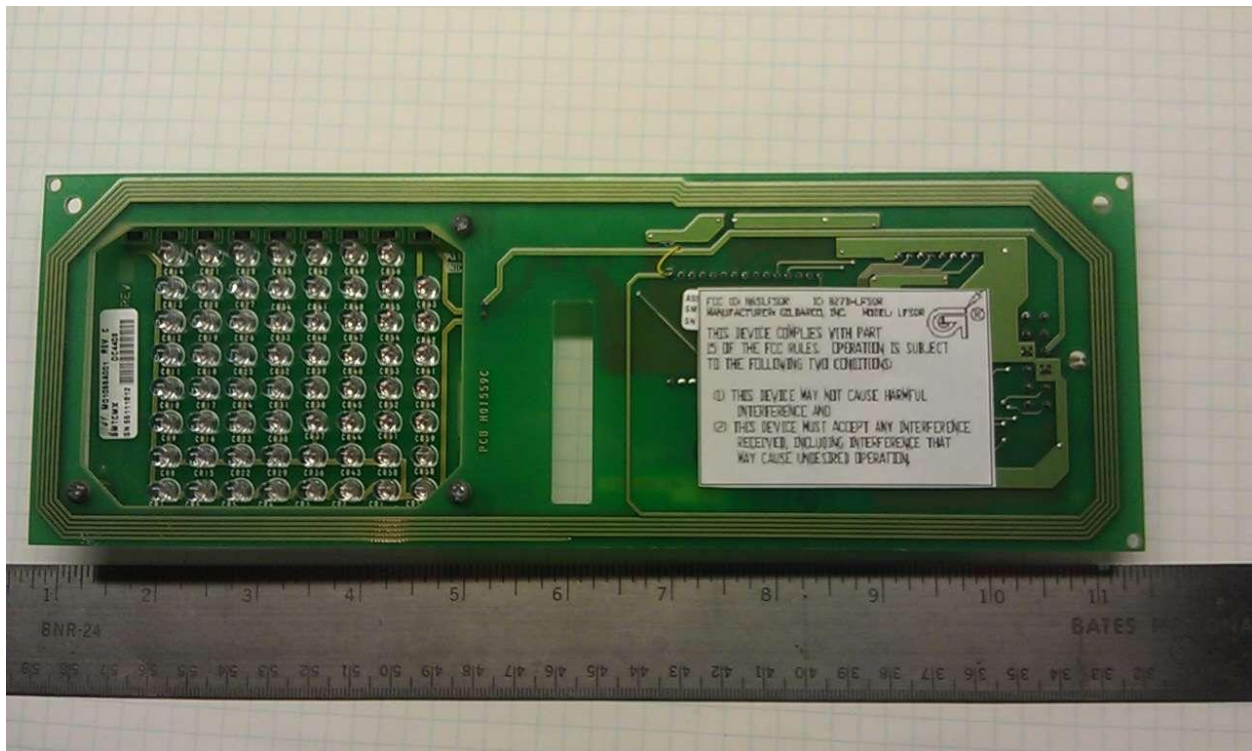

The N23951 module label location is shown in Figure 1

Figure 1 - Module Label Location

The Module FCC label is not visible from the outside of the host device when the module is installed. A FCC label part number M02962B017 is affixed to the host dispenser exterior and refers to the installed module. The M02962B017 label supplements the host product FCC label M02962B0101 which contains the two-part warning statement.

The M02962B101 host product FCC label is installed on all dispensers of this product line regardless of whether they have the TRIND option installed or not. The M02962B017 supplemental label is added in cases where the TRIND module is installed.

Both labels are detailed in the M02962 label drawing. The labels are located on the dispenser exterior inner sheathing as shown in Figure 2
