Ref: HP Notebook Regulatory Model Name HSTNN-W26C with FCC IDs N7NMC8775-H or
N7NMC5725-H

Dear Sirs:

During SAR testing of HP notebook HSTNN-W26C, two of the four User orientations of the display image in tablet mode failed FCC requirements. This is a declaration that the HP resolution implemented removes the ability of the User to select the two failing orientations. The User can only select one portrait and one landscape orientation, both of which pass FCC requirements.

If you have any comments or questions, please feel free to contact Walter Overcash or myself.

Sincerely,

Glenn Meyer
