1.) Regarding your answer to question 1 please replace the following statement on page of the user manual "Only PCs or Laptops will be supported during the trial." Please use something to the effect of " Only an IBM iSeries ThinkPad Type 1161 laptop computer and a Compaq iPaq Pocket PC will be supported during the trial."

**[Reply]** [The Manual has been revised. Please see the attached document.](#)

2.) No answer to question 2 could be located.

**[Reply]** [This device, while in the PDA host, is not expected to be in use when the PDA is put on lap, attached to waist or inside pocket because it does not have the voice feature so the only practical position is when the user holds the PDA at the reading distance from his/her eyes so he/she can view the small screen.](#)
