Hi Ying:

Thanks for your confirmation. Based upon FCC policy and TCB exclusion list, if Sierra Wireless is going to update the firmware to include HSDPA/HSUPA per 3GPP release 6, you are required to file Class II permissive change to FCC directly to update additional mode of operation.

Best Regards

Mike Kuo

The current firmware release doesn't support the HSUPA mode of operation, therefore this mode is not investigated.

Pls let me know if you have further questions.

Regards,
Ying

Question #1: Based upon the description in the user manual and in the theory of operation, this device is capable of having HSDPA mode of operation per 3GPP Release 5. However, by reviewing the capabilities of MSM7200 Microprocessor on Qualcomm web site, MSM7200 has capabilities of supporting HSUPA operation. Please explain why HSUPA mode of operation is not investigated.

Best Regards

Mike Kuo

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the

requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
