RE: FCC ID: N7NAC881

Dear Sir/Madam:

We have performed additional testing on the DUT (FCC ID: N7NAC881) after we study the latest test procedures on HSPA devices released by the Commission. Please replace the test report submitted on July 6, 2007 with the one submitted today.

After reviewing the test results, we think the change to the DUT as described in the cover letter of July 6, 2007 should be considered as a Class I Permissive Change per 47CFR Section 2.1043. However the Commission disagreed and requested for test data, therefore we are submitting the test data as in the case of a Class II Permissive Change.

Please contact me if you have any questions or need further information regarding this application.

Sincerely,

Ying Wang
Senior RF Engineer
