**Subject:** RE: Labelling of Small Surface Mount Device

Good Day,

If you wish to place HVIN or Certification Number in very small font, that would be acceptable as well. Otherwise, HVIN and Certification Number can be placed in the manual.

Regards,

**Subject:** Labelling of Small Surface Mount Device

To Whom It May Concern,

Sierra Wireless is in the process of applying for IC certification for a Surface Mount Device (SMD) module. The SMD module is to be soldered onto an end product and is not possible for the end-user to install or remove from the end product.

The photo and dimensions of the module are shown below.

Length = 11.5 mm
Width = 9.5 mm
Thickness = 2.4 mm

Due to the small size of the device, it is not practical to mark the FCC Identifier and IC certification number in a font size of 4 points or larger. Pursuant to FCC Rule §2.925, the FCC Identifier will be placed in the user manual and on the device packaging. Sierra Wireless hereby seeks agreement from ISED to place the IC certification number in the user manual in accordance with Section 4 of RSS-Gen Issue 5.

I look forward to your reply.

Regards,

---
