
Justification of Labelling

Federal Communications Commission
7435 Oakland Mills Road
Columbia MD 21046

Date: June 22, 2018

Module: FCC ID: N7NEM7455

Host model name: Lenovo MIIX 320-10ICR

The label exhibit of this FCC filing showed the location of the label on the label on the inside of the access panel.

According to KDB 784748 D01, as an option to placing the FCC label on the exterior of the device, the FCC label may be placed in user accessible area if the following conditions are met:

Requirement	Justification
The device is handheld (Tablet PC are considered as handheld);	It's for Lenovo Tablet PC (Lenovo MIIX 320-10ICR)
For certification, the product shall bear a nameplate or label with the FCC Identifier (FCC ID), as defined in Section 2.925. The FCC ID must always be accessible when using the product. The placement of the FCC ID must be a physical label on the product, unless an e-label is used. Physical FCC ID labels must be located on the surface of the product, or within a user-accessible no detachable compartment (such as the battery compartment). The label shall be permanently affixed, permitting the device to be positively identified. The font needs to be readily legible, consistent with the dimensions of the equipment and its label area.	Lenovo provide Lenovo MIIX 320-10ICR Regulatory Notice directing the user where to find the FCC label and meet the requirement.
The user accessible area must not require any special tools for access, and the FCC label must not be placed a removable part.	The access panel where the labels are affixed to is a functional panel because it must be on the Tablet PC for the Tablet PC function; therefore, it is not considered a "removable" part. Also, the Philip screw driver is not a special tool.

<p>The FCC ID, Model number, or FCC logo must be on the label and must meet all general labelling requirements or policies that apply for Certification, sDoC.</p>	<p>Lenovo meets all general labelling requirements.</p>
<p>When the device is so small, or for such use that it is impracticable to label it with the compliance statement specified in a font that is four-point or larger, and the device does not have a display that can show electronic labeling, then the information required shall be placed in the instruction manual, and on the device packaging or on a removable label attached to the device. In cases where the instruction manual with the compliance information is a printed document provided along with the device, the arrangement is acceptable for compliance with the Part 2 and 15 rules for information to the user. Where the instruction manual is not a printed document, a paper slip printed with the Part 15 compliance information and included with the device will also meet the requirement of the rules.</p>	<p>Lenovo provide Lenovo MIIX 320-10ICR Regulatory Notice directing the user where to find the FCC statement and meet the requirement.</p>

Sincerely,

Best Regards

Mandy Wang (Agent)
