

Modular Approval Request Letter

Date: August 5, 2024

FCC ID: N7NHL79

To whom it may concern:

The following attestation addresses the requirements to support modular approval pursuant to §15.212 of the Commission's Rules:

Modular approval requirement	EUT
1. The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	Module Radio elements are shielded. Please see submitted external photograph exhibits
2. The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	Module chipset design incorporates integrated buffer circuitry
3. The modular transmitter must have its own power supply regulation.	Module chipset incorporates voltage regulation to transceiver circuitry
4. The modular transmitter must comply with the antenna and transmission system requirements of §§15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of §15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section.	Not applicable to licensed modules
5. The modular transmitter must be tested in a stand-alone configuration, <i>i.e.</i> , the module must not be inside another device during testing for compliance with part 15 requirements.	EUT conformance testing was performed in a standalone configuration
6. The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	Please refer to FCC ID label format. Labeling instruction has been provided in the user manual exhibit(s).
7. The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	The Module is compliant with all applicable FCC rules. Compliance requirements are stated in the user manual exhibit(s).
8. The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.	Compliance with RF exposure requirements is addressed in RF exposure report
