Re: FCC ID: N7NMC8781-F

Applicant: Fujitsu Limited
Correspondence Reference Number: 36117
Form 731 Confirmation Number: EA171420
Date of Original E-mail: 08/28/2008

1) user manual exhibit appears to show only brief instructions and/or regulatory info - pursuant to 2.1033(c) please submit final product operating instructions to be provided to end user

User Manual: Since this current application was mainly relating to UMTS module, only the UMTS portion of the user manual was submitted. For full user manual of laptop, WLAN, BT please refer to Granted application as stated in the cover letter and Sierra authorization letter (attached)

-Collocated with radios as documented in FCC ID: EJE-WB0058, FCC ID: EJE-WB0059 and FCC ID: EJE-WB0060.

User manual also attached.

2) if not in filing already, please provide details about whether and how transmitter or display orientation are disabled for certain edge positions facing a user

Yes, some edges as stated in the supplied report are disabled. This is done in the factory by installing a limited rotation video driver of the laptop.

3) fyi we note FCCID in SAR report sec. 3.1 does not match application

Your FYI point is noted.

4) As we understand this is C2pc to register collocation evaluation for N7NMC8781-F separately with models T5010 and T1010 and fccids EJE-WB0058, EJE-WB0059, EJE-WB0060 . Cover letters mention simultaneous transmission. Whereas FCC Lab are revising policies in attempt to streamline whether or not all FCCIDs when integrated within a multi-module product are required to submit separate C2pc, at least the full locations and descriptions info for all antennas and transmitter powers during SAR, and simultaneous SAR info where applicable, should be submitted in case only a single C2pc filing is used; this info was not found - please explain and/or submit.

Since FCC is still revising these policies, we have just gone by our previous submissions where only one C2PC application was submitted for a Multi-module product. Please see application for N7N-MC5725-F. We have written to the FCC (Tim) in the past about this issue and will be writing further with comments before the Oct TCBC.
