## RE: Request for FCC module certification FCC ID: N82-KOHLER021

We hereby request a "Modular" certification for the FCC ID referenced above. The device meets the requirements indicated below as outlined in the FCC KDB 996369 D01 Module Equip Auth Guide v01r04

• The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly. **Yes, has metal shielded.** 

- The device has buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal;
- There is a STM32 MCU inside module as an embedded processor to buffer the data
  The device has power supply regulation on the module;
- There is an external LDO chip on the module as power supply regulation
- The device has a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b);
- The device integrated a BLE module and a Wi-Fi module, both of them have a PCB antenna The device has demonstrated compliance in a stand-alone configuration:
- The device has demonstrated compliance in a stand-alone configuration,
- The device will be labeled with its permanently affixed FCC ID label, or use an electronic display. The label position of module is clear indicated, please see the label file.
- The device does comply with all specific rules applicable to the transmitter including all the conditions provided in the integration instructions by the grantee;
   The device is compliant with all applicable FCC rules, detail instructions are given in the user manual
- The device does comply with RF exposure requirements.
- The device is compliant with RF exposure requirements, please see MPE report

Sincerely,

othy flession
