

Operating Instruction

1. Installing the Receiver

- * Mount the Receiver upside up as the left figure.
- * Connect the RED wire to power supply +5V and the BLACK wire to power supply common GND.
- * The GREEN wire is DATA output for control unit not included.

2. Operating the Receiver

- * Use a standard 318MHz RF transmitter not included to remote control the receiver.
- * When the receiver receives the signal from transmitter, then the GREEN data wire will output the demodulated data.

GTO, Inc. Part Number: AQ201-NB and AQ202-NB

GTO, Inc. narrow band receiver models AQ201-NB and AQ202-NB are designed to be used with all GTO/PRO and Mighty Mule brand gate opener products together with your GTO and Mighty Mule narrow band transmitters. The narrow band transmitter can be identified by its color, gray. If you have an older model transmitter, or another brand, please contact our Customer Service Department at 800-543-4283.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
