Roman Wroczynski
Manager – Product Integrity

Gentlemen:

Enclosed with this letter is our application for Certification of the radio system described herein operating in the DEMS 24GHz band. Teligent Inc., our customer to whom this radio is being supplied, has been granted licenses (sample copies included) with permission to operate commercial wireless services in the DEMS 24 GHz band with a relaxed digital emission mask. In accordance with the discussion at the meeting with you on October 27th, this allows Nortel Networks' radio equipment described in this application to be approved.

Also based on the discussion at that meeting, Nortel Networks understands that the equipment identified in the Certification application and the attached test report will only be sold to Teligent Inc.

Thank you, and if there are any further questions feel free to call me.

Regards

Roman Wroczynski
Nortel Networks BWA, Winnipeg
