9/24/99

TO: George Tanahill
FCC

Subject: FCCID:NAHRTR433

Dear George:

1. This unit has several different pulse trains or codes for the different functions. These are specific addresses. These specific address pulse trains are generated in the chip from a switch closure at a specific input.
2. I've also sent a copy of the DoC for the receiver portion to you. We tested it and approved it.

BEST REGARDS,

Sid Sanders
