

Print labels with country specific codes as shown

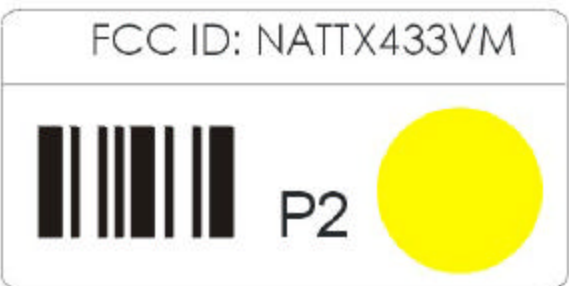

Label placement for
valve mount transmitter
200.0065

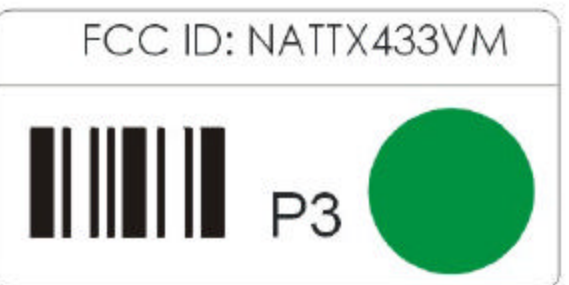

269.0117.06

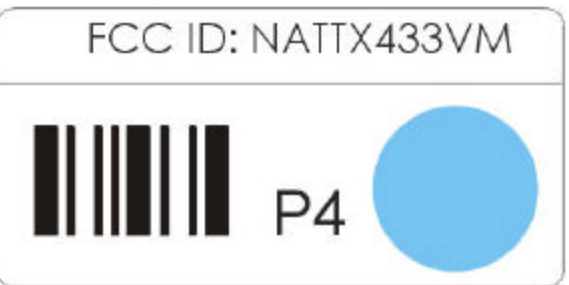

269.0117.07

269.0117.08

269.0117.09

Pre-print label as shown above prior to fulfillment of kit
The bar code is used to identify the position of the transmitter
and relate this position to the ID of the transmitter for
programming the receiver. The colored code and P(x) number
assist the tire technician so that the transmitters can be installed in
their default positions.

See - 1097-Product Identification
and Labeling Specification for bar code definition
