Dear Helen,

Please refer to below for our reply.

Best Regards,

Ting

Question #1: The test report includes MPE calculation, the device is classified as mobile device. Please add required RF exposure statement such as 20cm separation distance (for cradle) into the manual.

Ans #1: The statement for cradle has been added and please refer to the attached for revised user manual.

Question #2: The manual does not contain any information as how to install the software to enable bluetooth function and how to setup communication link between the scanner and the cradle. Please provide basic application information.

Ans #2: Please refer to the attached for revised user manual.

Question #3: Please confirm the EUT description for this filing is "Handheld Bar Code Scanner", though it is part of Handheld Bar Code Scanner system, it is just a cradle, no scanning function at all. Please confirm if it is OK to use "Handheld Bar Code Scanner system (cradle)".

Ans #3: After confirm our client, they would like use original EUT description "Handheld Bar Code Scanner" because normally two devices are considered as a set.

(See attached file: AS-8510 cradle UserMan revised 0311.pdf)

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
