Exhibit 8
5 Basic features

5-1. Standby Mode

When power up pager, pager displays the day of the week, the time of the day, a symbol for selected alert of your choice, and a symbol of service area indicator.

Note: While you are reading the message, you can return to the standby mode any time by pressing the 🖅 button and ◁ button simultaneously.
5-2. Turning pager On

Press 🖅 button for two seconds to turn the pager to the standby mode from Off mode. Pager displays wake up message, if you're programmed, while sound two different tone alerts. After displaying the power screen, the time of the day, the day of the week, an alert indicator and service area indicator are shown.

* Press any button to stop the alert to return to the standby screen instantly.

5-3. Receiving and reading messages

Diva Plus pager can receive up to 20 sixteen character message. When a message is received, the pager alerts for 8 seconds.

① Press any button to stop the alert.

② Press 🖅 button to display the day and time of the day that message is received and the message slot number.

③ Press 🖅 button to display the received message.

④ Press 🖅 and ◁ button simultaneously to return to the standby screen.

14

22

17

Messages longer then 12 characters display on a second screen, indicated by symbol ▣ . Press 🖅 button to display the second screen. The message displays automatically returns to the standby mode after 14 seconds, if 🖅 button is not pressed.

If a message is not read, the pager shows "Page" and number of unread messages on the screen until 🖅 button is pressed and all message are read.

If you enabled the reminder feature, pager chirps in every 4 minutes to alert you for unread message(S) until 🖅 button is pressed and all message are read.
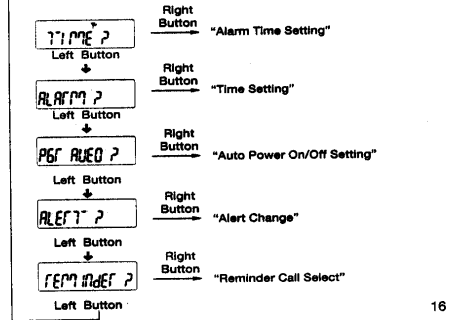

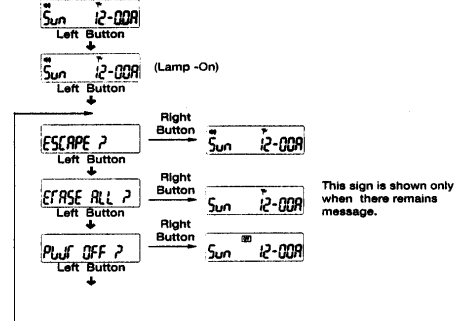

If pager receives more messages than its available memory can hold, the new message replaces the oldest read and unprotected message and "INFO FULL" displays on the screen. Replaced messages are lost and not recoverable.

"Diva Plus pager stores up to 20 personal messages in the memory. Reading time for each message is 14 seconds unless 🖅 button is pressed to advance to next received message, otherwise pager automatically returns to the stand-by mode in 14 seconds.

5-4. Setting the wake up message

This feature is for the user to program his own pager number so that user does't need to label the pager number on the pager. Wake up message displays every time pager powers up.
