

Non-Conformities FCC ID: NBZNRM-EU850D (CKC CS Ref # E07-000102-FCC-02)

The items listed below represent requests for information following review of this application for certification under United States (FCC) regulations. . Further question may arise pending review of responses to these items.

- 3 The test report indicates testing only at WCDMA for part 22 and GSM for Part 24. Please justify the modes used during testing and explain why not all modes were investigated.

Response: These represented worst case emissions profiles based on legacy data for the “mother” hardware, the EU870D.

- 4 I cannot locate instructions to the OEM for proper labeling of the equipment in accordance with Modular Transmitter rules; "if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization." Please provide instructions pertaining to proper labeling of the final product.

Response: A revised manual with labeling instructions has been uploaded.
