RF Exposure

This transmitter has a nominal power output of slightly less than 1 Watt. In this application (pcmcia card to be inserted in a laptop computer), the Commission considers it to be a mobile device and typically requests information be provided to the user that he should maintain an operating distance of 20 cm from the body.

Novatel has decided that in lieu of placing this warning statement in the manual, they will provide SAR information to the FCC and is now in the process of having the test conducted. The SAR data will be available shortly and will be provided as soon as it arrives.
