RE: NBZNRM-MC950D

To Whom It May Concern:

This letter is to describe an accessory to be shipped with the MC950D USB HSDPA Modem. This Accessory consists of a Cable and Clip that attaches to the screen of the user Laptop.

The cable attaches to the User Laptop through a USB port, and attaches to the USB Modem with the Clip in place...The Clip is attached over the top of the Laptop Screen and held in place there. See attached photos in this submission.

This orientation then operates as a Mobile Device with >20cm separation between the user and the transmitting antenna.

Sincerely,

John Spall

Manager – Antennas and Regulatory Group

Novatel Wireless
