Re: Firmware functionality for Ovation MC990D (NBZNRM-MC990D)

Dear Sirs:

Regarding the product in question in response to a question posed to our TCB (PCTEST), none of the following operational parameters that have been found to be fully compliant with the Commissions Rules can be altered by firmware upgrades available to end users of the product(s):

- Frequency Range
- Modulation Type
- Maximum Output Power

The manufacturer Novatel Wireless has complete control of firmware releases/upgrades that can alter radio parameters of interest to the commission.

Sincerely,

Jim Turner
