Re: 3 GPP Testing on Novatel Merlin X950D Modem

Dear Sirs:

Regarding the product in question, two revisions have been tested and verified to be compliant with all relevant sections in CFR 47 Part 22 and 24, and FCC OET 65 SAR requirements.

To demonstrate compliance to CFR 47 Parts 22 and 24 for the revision that supports 3GPP Release 5 HSDPA functionality, results can be found in NTS Test Lab report No. GC-626-RA-1-2, dated 8/30/2007. Verification of compliance to SAR requirements can be found in RF Exposure Labs LLC Report No SAR .20070602, dated 6/15/07.

The second revision supports 3GPP Release 6 HSUPA functionality. The results can be found in the attached CETECOM Inc. reports under Form 731 Confirmation No. EA207811.

There are no hardware changes between these revisions of product.

Sincerely,

Jim Turner
