Response to Inquiry to FCC (Tracking Number 963512)

**Inquiry:**

Dear FCC,

According to the current policy for TCBs on the handling of 3G mobile phone technologies, the TCB has to involve the FCC prior to certifying any 3G device.

We are currently in the process of certifying another PCMCIA Card operating in the US bands GSM 850 + PCS 1900 and WCDMA 850 + 1900 MHz.

Recent FCC trainings, telephone conference calls and the SAR Measurement procedure for 3 G devices (Published on June 9th, 2006) have been taken into consideration.

Kindly ask you to confirm or advice.

**Response:**

Please contact [EASTECH@fcc.gov](mailto:EASTECH@fcc.gov) to request latest info about what devices require TCB Permit-But-Ask procedures.

Devices within scope of most recent FCC 3G SAR Procedures must fully apply those procedures to qualify for TCB application processing.

Do not reply to this message. Please select the [Reply to an Inquiry Response](#) link from the OET Inquiry System to add any additional information pertaining to this inquiry.

-> TCB Remark: EASTECH@fcc.gov contacted and device functionalities compared with actual list of devices require TCB Permit-But-Ask procedure found on KDB system.
