**Overall Assessment Letter for Option NV MO0407
FCC id: NCMOMO0407**

I have reviewed this application for a Limited Single Modular Approval and find it compliant.

This is an application for a modular transmitter which supports GSM/GPRS/EDGE 850/1900 & UMTS/HSDPA/HSUPA 850/1900/AWS. The module additionally supports GSM/GPRS/EDGE 900/1800 and UMTS/HSDPA/HSUPA 2100, however are not relevant as they are not supported in North America.

As a result of the assessment review several exhibits were requested to be provided and/or updated. An exhibit showing the label positioning, and operational description was requested. MPE Reports were requested to be submitted in addition to Part 22 and 24 test reports. The Part 15B and 27 test reports were requested to be updated to include the FCC ID. The user manual was requested to be updated to provide guidance in relation to the FCC ID label visibility on the final host product (when available). A letter was requested to be provided describing the differences between the MO0407 model and the original MO0402 (FCC ID: NCMOMO0402-2) and this was subsequently provided. The power of attorney letter was requested to be updated to include an additional agent.

Please note this product, Option NV Model: MO0407 is a variant of previously authorized, Option NV Model: MO0402 (FCC ID: NCMOMO0402-2). The MO0407 has an added AWS band (FDD4) and therefore a new application is being made under FCC ID: NCMOMO0407. A product equality declaration is provided within the submission which provides additional information. Additionally a full description of the HW changes is provided in a separate exhibit which is filed as an Operational description exhibit. The original Part 22 and Part 24 EMC and MPE test reports covering the original Model (MO0402) are being supplied.

Yours sincerely

Vina Kerai
