## **Federal Communication Commission Interference Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

### **FCC/IC Radiation Exposure Statement:**

This equipment complies with FCC/IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance **20cm** between the radiator & your body.

To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (EIRP) is not more than that required for successful communication"

"This device has been designed to operate with an antenna having a maximum gain of **2** dBi.

Antenna having a higher gain is strictly prohibited per regulations of Industry Canada. The required antenna impedance is 50 ohms."

“To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that permitted for successful communication.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

Country Code selection feature to be disabled for products marketed to the US/CANADA

This Class [B] digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe [B] est conforme à la norme NMB-003 du Canada.

## Important Safety Instructions

1. Do not place the product near water or in humid and / or hot environment, like bathroom or kitchen. Please refer to the specification of the environment.
2. This product is designed to be used indoor.
3. **Avoid swallowing any parts, components, or accessory of this product.**
4. If this product is dropped into water when it's powered on, DO NOT ATTEMPT TO RETRIEVE BACK BY YOURSELF! Switch the electrical power switch off first, and call a qualified electrical technician for help.
5. If to hang this product, please make sure placement is properly secured. Misplacement would cause falling and damage this product and injury to people!
6. Do not drag any connected cord with force; the terminal and cord will be damaged.
7. Only use dry cloth with water to clean this product; do not use alcohol or other chemical solution to clean this product.
8. Do not repair, disassemble, or modify the product; if the product is not working properly, please contact the dealer of purchase.
9. Do not put the product and / or A/C adapter directly on paper, cloth, or other flammable materials. After hours of use, this product will become hot, and may cause flammable materials placed under it to burn.
10. Do not cover the product with cloth or any material; the product will become overheat and cause malfunction, even cause fire.
11. When the product is powered on, do not connect or disconnect any connection cable.
12. If not using the product for a long time, please unplug A/C adapter from wall socket, and remove the battery inside remote controller.

Congratulations on your purchase of Edimax wireless projector server WP-S1201. This section introduces you to the WP-S1201 (referred to as the WPS in this user guide).

## 1-1 Package Contents

- (1) WP-S1201
- (2) AC adapter
- (3) Remote controller
- (4) IR receiver extension cord
- (5) AC adapter extension cord
- (6) VGA cord
- (7) Quick Installation Guide
- (8) Software CD-ROM

## 1-2 Requirements

<b>PC CPU Speed</b>	<b>Intel Pentium 4/1.5 GHz or higher</b> (Recommend Intel Core 2 Duo CPU For Video Playback Mode)
<b>Memory</b>	<b>512 MB of RAM or higher</b> (Recommend 1GB of RAM For Video Playback Mode)
<b>Operating System</b>	<b>Windows XP 32 bit or above</b> (Recommend Windows XP 32 bit) <b>MAC OS X 10.4 and 10.5</b> (Both PowerPC / Intel Version)
<b>Network</b>	<b>100Mbps Wired Fast Ethernet /</b> <b>11Mbps 802.11b wireless Ethernet</b> (Recommend 54Mbps 802.11g wireless Ethernet)

## 1-3 Highlights

Thanks again for choosing the product. This product allows multiple users to connect to the same projector by wired or wireless network and avoiding the hassle of using VGA cable.

### Features

- 1** 802.11 b/g/n Wireless compatibility.
- 1** Supports both Wireless and Ethernet connectivity
- 1** VGA connections
- 1** Conference control
- 1** Supports multiple users at the same time *with* Quarter split screen
- 1** WPS (Wi-Fi Protected Setup)
- 1** **Output Resolution: 1024x768 or 800x600.**
- 1** Upgrade software via the Internet.
- 1** Network security.
- 1** Presentation remote
- 1** Video capture, to capture screen image for projection.

*\*This function will be available in Q4, 2009 via upgrade through Internet.*

## 1-4 Part Names

### Front View

Item No.	Description
1	WPS: Single Click when the device is ON. Turn On: Single Click when the device is OFF.
2	'POWER' LED
3	'LAN' LED
4	'WIRELESS' LED
5	'PC IN' LED

### Back View

Name	Description
12V	Connect to A/C adapter / Edimax projector's D/C power outlet
LAN	10/100Mbps fast Ethernet port
IR IN	Connect to IR receiver
Audio Out	Stereo audio output
VGA OUT	VGA video output
Antenna	Receives wireless signal.

### Side View

Name	Description
PC IN	Connect to computer's VGA output port

*Note:*

**1) WPS stands for Wi-Fi Protected Setup.**

## Remote Controller

Item No.	Description
1 Power	Stand-by mode on/off
2 Login	Show user list: Single Click.
2 	WPS: Press and hold for 3 seconds.
3 Prev. user	Move up to select user for presentation
4 Next user	Move down to select user for presentation
5 Page up	Go to previous page
6 Page down	Go to next page
7 Confirm	Confirm selected user for presentation
8 Battery Lid	Press battery lid and push it downward by your thumb to open battery compartment
9 IR LED	Infrared signal transmitter

### Note:

1) Remote controller effective distance is 7 meters. This distance will be shortened in some environments, or when the battery is low.

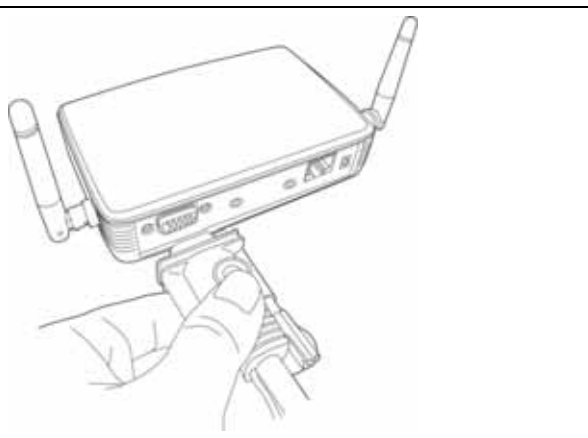

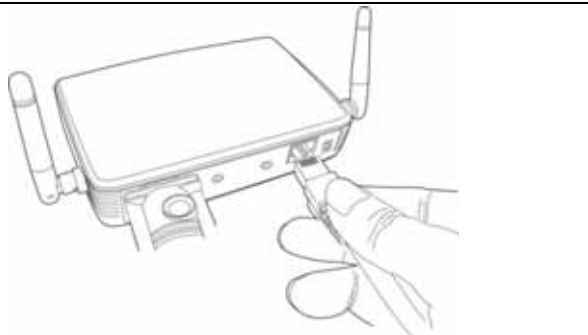

2) If there's strong light source near WPS and / or remote controller, remote controller may not be able to function properly.

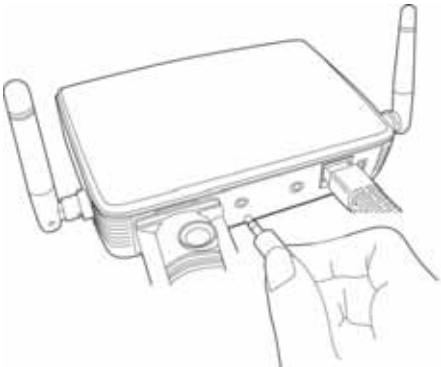

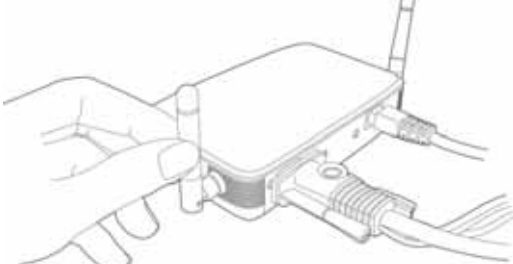

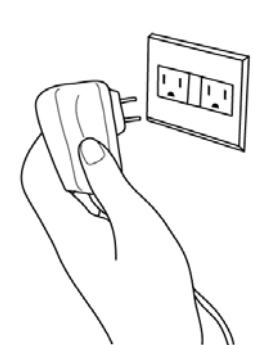

## 1-5 Initial Setup

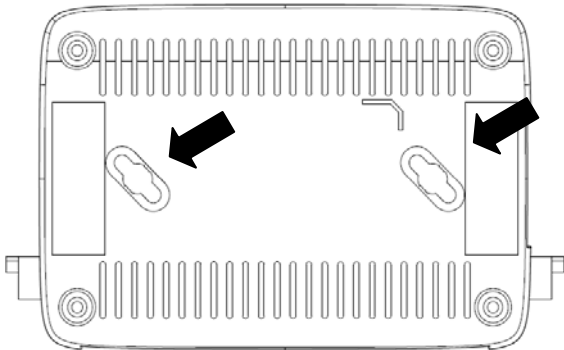

### Connection Overview

### Step-by-step setup instructions

	Connect one end of the VGA cable to the external display, and the other to WPS VGA-out port locates at back.
	Connect the Ethernet cable to the LAN port

	<p>Connect audio cable to WPS Audio-out Port located at the back, and the other end to an external amplifier / speaker.</p>
	<p>Connect the IR receiver extending cable to 'IR IN' port located at the back of WPS, and place the IR receiver at a place where you can point the remote controller to it easily</p>
	<p>Adjust the antennas so they are perpendicular to the ground.</p>
	<p>Connect the A/C power adapter to the electrical outlet on the wall.</p>
	<p>Connect A/C power adapter to the power jack labeled as '12V' at the back of WPS.</p>

	<p>To fix the product placement, please use two wall mount holes located at the back of the product.</p>
	<p>If you can see this start screen display on projector, indicates WS-1201 is working and all connection cables are correctly connected.</p>

*Note:*

***DO NOT USE VELCRO STICKER ALONE TO FIX THE PRODUCT ON THE WALL!***

# Chapter II Using WPS

## 2-1 Check the IP address of WPS

When WPS is powered on, check the connected display, you can find the IP address and login code Instruction Page:

LOGIN CODE: 1234

**To Project using Wireless Presentation Gateway**

- 1 Select WPG-350 from laptop/PC's wireless access point menu.
- 2 Open WPG-350 Software and Enter login code as indicated to start projection.

**To Install Wireless Presentation Gateway Software**

- 1 Select WPG-350 from laptop/PC's wireless access point menu.
- 2 Open a web browser and enter wireless IP address shown below.
- 3 Install WPG-350 software from the webpage menu.
- 4 Enter Login code as indicated to start presentation.

Note: Disable firewall if encounter connection difficulty.

Device Name: WPG-350  
Wired IP: 192.168.0.1  
Wireless IP: 10.30.40.1

User Name	IP
Jimmy Chang	102.54.56
Jimmy Chang	102.54.56
Jimmy Chang	102.54.56
Jimmy Chang	102.54.56
Jimmy Chang	102.54.56

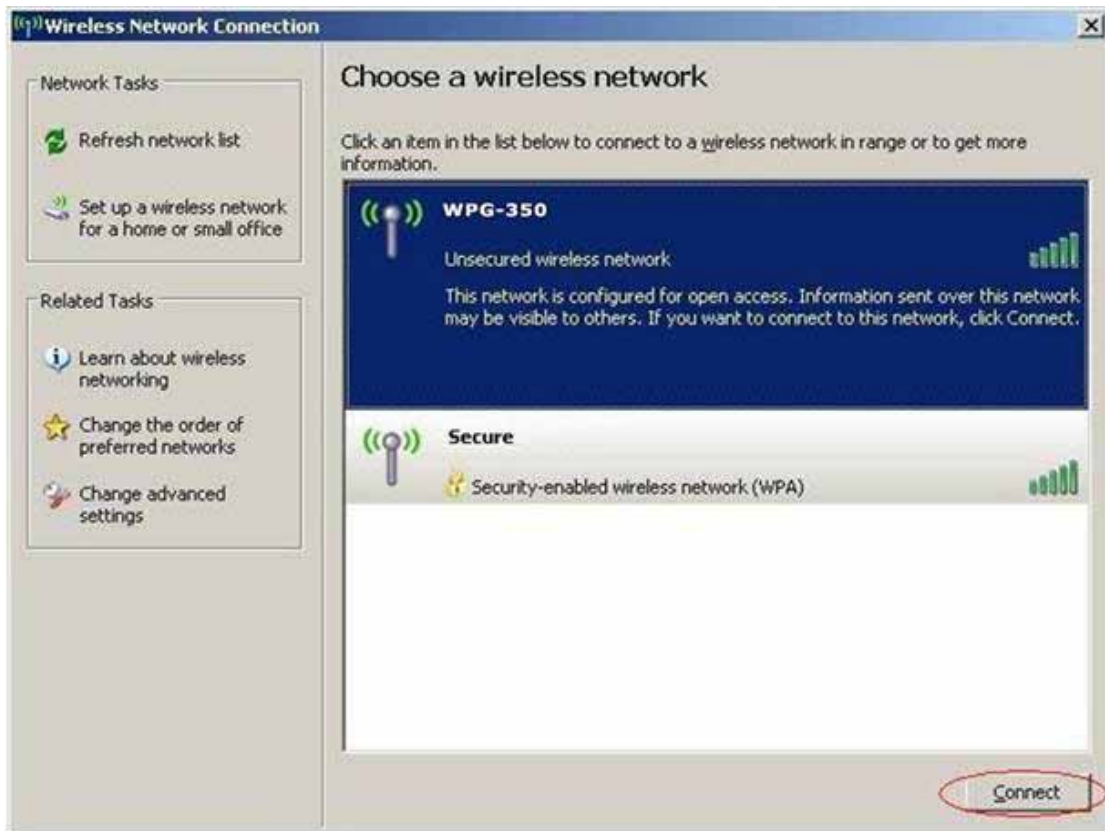

The IP Address (Wireless / Wired Ethernet) of the device.

You can connect to WPS by the IP address of the connection type you're using (wired / wireless).

## 2-2 Connect to WPS by wireless network

Use your computer's Wireless Network Connection window to access an available wireless network. Select the device from the list. Click Connect. The default device name is WP-S1201.

Note: If using a wireless client other than Windows, the screen above may look differently. For more details, see your PC user guide.

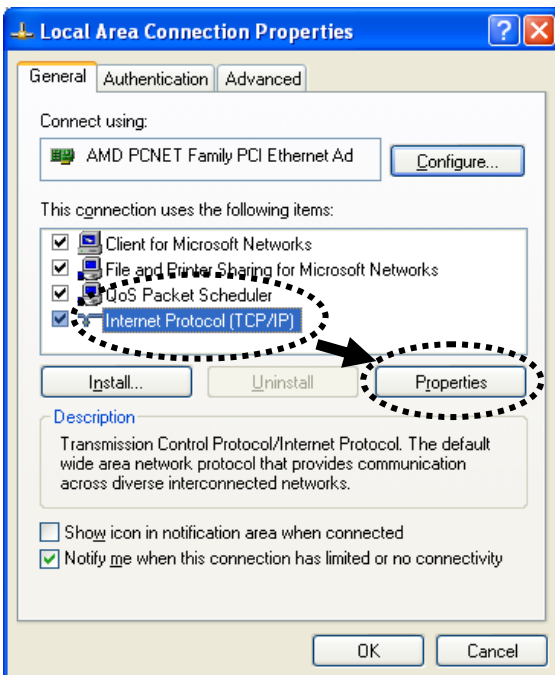

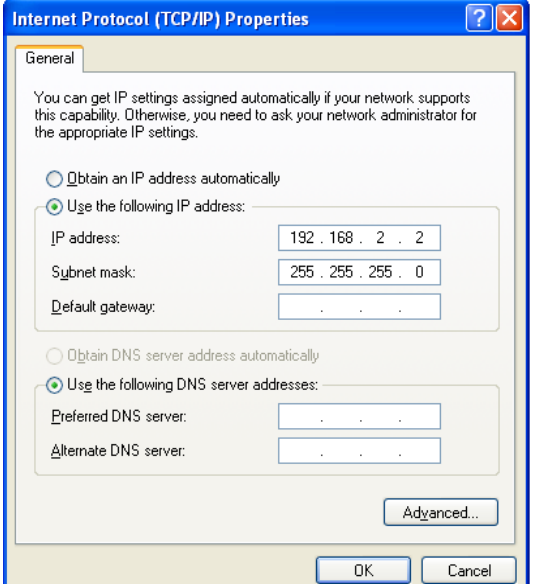

## 2-3 Manual Network Connection Setting

If there's no DHCP server available on your LAN, please follow the following instructions to set the IP address of the computer.

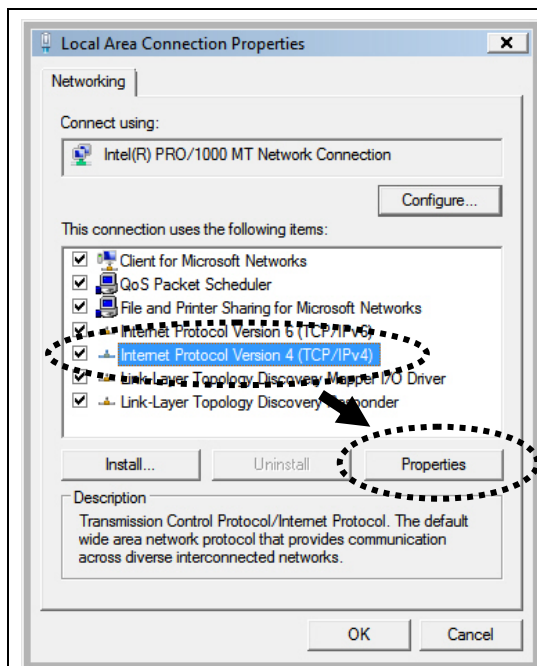

*If the operating system of your computer is....*

<b>Windows XP</b>	<b>- please go to section 2-3-1</b>
<b>Windows Vista</b>	<b>- please go to section 2-3-2</b>
<b>Macintosh</b>	<b>- please go to section 2-5-4</b>

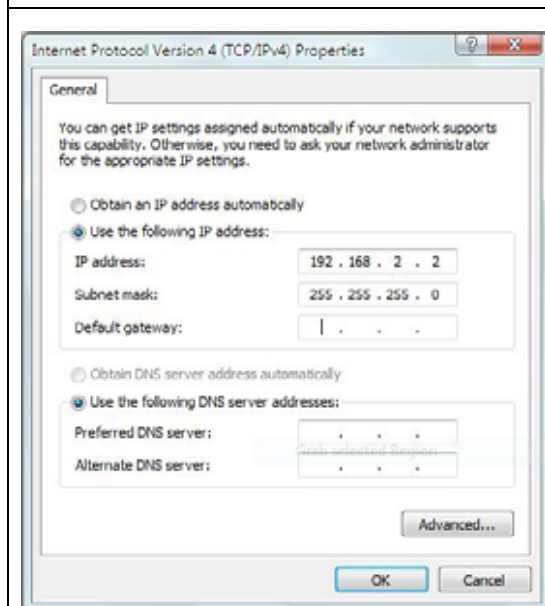

### 2-3-1 Windows XP IP address setup:

	<p>Click 'Start' from windows toolbar locate at bottom, open control panel, then select <b>Network and Internet Connections</b>, click <b>Network Connections</b>, and then double-click <b>Local Area Connection, Local Area Connection Status</b> window will appear, and then click 'Properties'</p>
	<p>Select 'Use the following IP address', then input the following settings in respective field:</p> <p>IP address: 192.168.0.x (where x is an integer greater or less than 200, if there's more than one computer need to use this WPS on the same network, each computer should use an unique number) Subnet Mask: 255.255.255.0 Click 'OK' when finish.</p>

### 2-3-2 Windows Vista IP address setup:

Click 'Start' from windows toolbar locate at bottom to select control panel. Click **View Network Status and Tasks**, then click **Manage Network Connections**. Right-click **Local Area Network**, then select **'Properties'**. **Local Area Connection Properties** window will appear, select 'Internet Protocol Version 4 (TCP / Ipv4)', and then click 'Properties'

Select 'Use the following IP address', then input the following settings in respective field:

IP address: 192.168.0.x (where x is an integer greater or less than 200, if there's more than one computer need to use this WPS on the same network, every computer should use an unique number)

Subnet Mask: 255.255.255.0

Click 'OK' when finish.

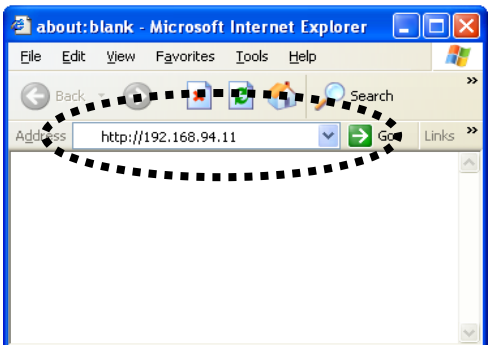

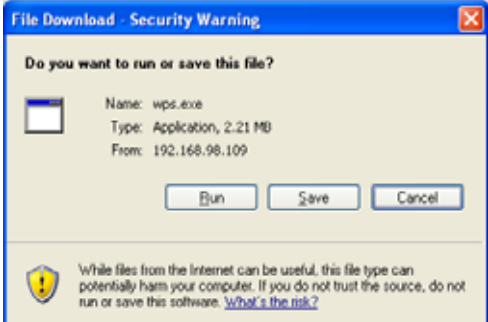

### 2-3-3 Macintosh IP address setup:

	<p>Select 'System Preferences', and double-click 'Network'.</p>
	<p>Select 'Manually' in 'Configure' field, then input the following settings in respective field:</p> <p>IP address: 192.168.0.x (where x is an integer greater or less than 200, if there's more than one computer need to use this WPS on the same network, every computer should use an unique number) Subnet Mask: 255.255.255.0</p>

## Chapter III Using Application Software (PC Version)

### 3-1 Download and Install Application Software

Before any computer can use the WPS, application software must be installed first. Please follow instructions to download and install WPS application software:

	<p>Use the web browser to connect to the IP address shown on WPS (Wireless / Wired IP address)</p> <p>WPS's IP address is shown at the Instruction page.</p>
	<p>Click 'For Windows' button to download application software.</p>
	<p>A window is prompted, to execute, please check “run”, or “save” to save application software for future usage.</p>

	<p>Please be patient when your computer is downloading application software:</p>
	<p>After application software download is complete, click 'Run'.</p>
	<p>Click 'Next' to continue.</p>
	<p>A new icon will appear.</p>
	<p>Double click the icon to launch login window, 'Server IP' will be determined automatically, please input a user name (login window uses your computer's name by default), and input login code as displayed on upper-right of WP-1201's display.</p>

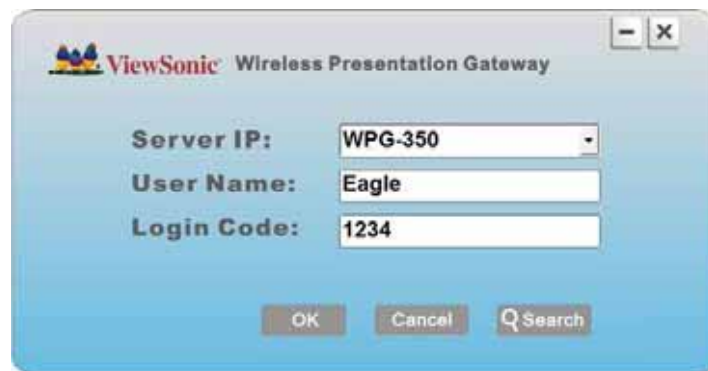

If login code is correct, application software will appear.

### 3-2 Launch Application Software and Login

Double-click on application software to launch WPS's application software.

Application software will search for WPS connected to local area network when it starts, WPS's device name will be displayed at 'Server IP' field:

Please input a unique user name (used to identify each WPS user and should not be the same as other users) in 'User Name' field, and input the login code as shown on WPS's Instruction page. *When you're ready, click 'OK' button to continue.*

Application software will use your computer's name as user name. You can use this name, or input any user name in 'User Name' field, and input the login code as shown on WPS's Instruction page. *When you're ready, click 'OK' button to continue.*

Login code must match with the one display on WPS's Instruction page, else following message would appear. Click "OK" to enter the login code again.

### 3-2-1 Use icon on application software

No.	Name	Function Description
1	Menu	Access menu list.
2	Play / Pause	Start / pause presentation. When pausing a progressing presentation, the displaying image will freeze; press play button again to resume
3	Minimize	Minimizes Application Software window
4	Close	Closes Application Software window
5	Stop	Stop a progressing presentation
6	Present	Switches to present mode
7	Login code / Signal	Displays login code (4-digit number) and wireless signal strength
8	Video playback	Starts video playback mode
9	VGA switch	Switch display source (display the image from your computer's display or from 'VGA IN' connector)

10	'1' to '4'	<p>Quarter split display control. Click number 1 to 4 to start / stop presentation of corresponding quarter split display area.</p> <table><tr><td>1</td><td>2</td></tr><tr><td>3</td><td>4</td></tr></table>	1	2	3	4
1	2					
3	4					

### 3-2-2 Menu List

Besides the buttons, you can also click 'Menu' button to access menu list.

Item Name	Function Description
Administrator	Go to 'ADMIN' page of web menu
Open File	Open a video file for video playback (in video playback mode)
Status	System / IP Address: check the system status and the IP address of WPS

	<p>Signal Status: check the status of wireless connection.</p> <p>About: check the version of application software:</p>
Control	<p>VGA1: Displays your computer's display content on projector</p> <p>VGA2: Display 'VGA IN' port's display content on projector</p> <p>Search**: Automatically select an active content source</p> <p>The content source being used currently will have a check mark in front of it.</p>
Power Off / Log Out	Stop using application software and logout.
Play / Projection	<p>Play: start presentation</p> <p>Pause: Pause presentation</p> <p>Stop: stop a progressing presentation</p> <p>Blank: blank displaying image (all black)</p> <p>Repeat: Repeat video playback (in video playback mode)</p> <p>Minimize: minimizes application software</p>
Display	<p>Display: Show the name / SSID of WPS</p> <p>Output resolution: changes display resolution and you can click "<b>Follow Desktop</b>" to equivalent to output based on original user desktop resolution setting.</p> <p>The resolution being used currently will have a check mark in front of it.</p>
Exit	Close menu list

### 3-3 Video playback (PC Version)

When you click 'Video' button in application software, the user interface will change and look as follow:

No.	Description
1	Playback / Pause
2	Volume up
3	Fast forward (for 10 seconds)
4	Stop video play
5	Volume down
6	Rewind (for 10 seconds)
7	Open video file

To start video playback:

1. Click 'Video' button
2. Click (7)  to open video file.
3. Video will start playing automatically.
4. Click (4)  to stop playing video.

### 3-4 Quarter Split Screen

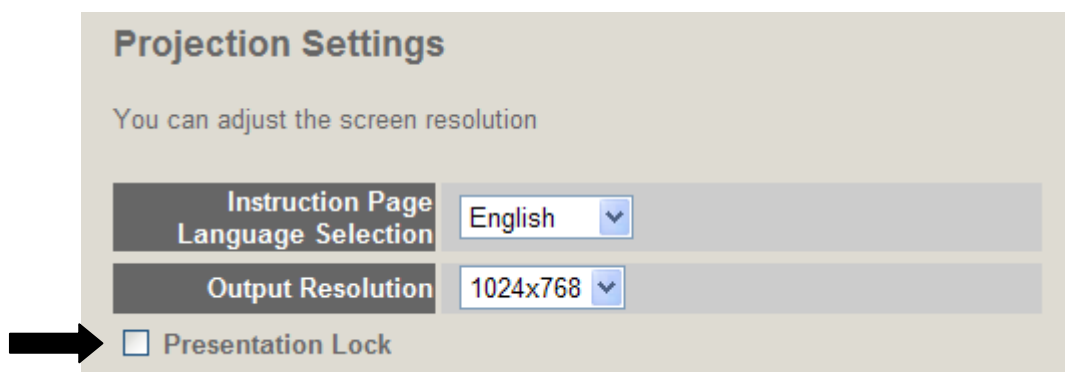

When there is more than one presenter, you can use this function to display up to 4 presenter's content to present on display screen simultaneously.

To use Quarter Split Function, please login to WPS, and select a key (1 to 4) to present:

	<p>Number 1 to 4 correspond to different area of display screen:</p> <table border="1" data-bbox="853 790 1161 974"><tr><td>1</td><td>2</td></tr><tr><td>3</td><td>4</td></tr></table> <p>When you click a number, your content will be displayed in corresponding Quarter-Split display area</p>	1	2	3	4
1	2				
3	4				

To show content in full-screen mode, simply click 'Play' button; to resume to Quarter-Split display, simply click number key 1 to 4.

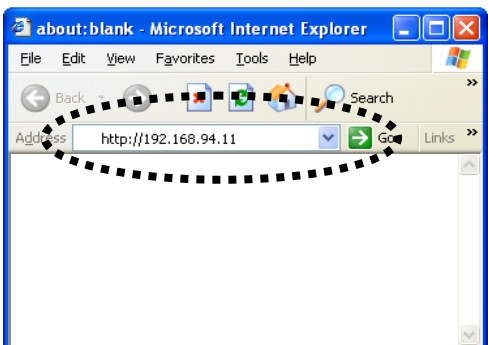

**NOTE: When 'Presentation Lock' is checked, no one will be able to interrupt a progressing presentation.**

## Chapter IV Using Application Software (MAC Version)

### 4-1 Download and Install Application Software

Before any computer can use the WPS, application software must be installed first. Please follow instructions to download and install WPS application software:

	<p>Use safari or IE web browser to connect to the IP address shown on WPS (Wireless / Wired IP address)</p> <p>WPS's IP address is shown at the <a href="#">Instruction page</a>.</p>
	<p>Click 'For MAC' button to download application software.</p>
	<p>Double-click application software icon to launch application software.</p>
	<p>You'll see application software now. 'Server IP' will be determined automatically, please input a user name (login window uses your computer's name by default), and input login code as displayed on upper-right of WP-S1201's display.</p>
	<p>If login code is correct, application</p>

	software will appear.
--	-----------------------

#### 4-2 Launch Application Software and Login (MAC Version)

Double-click on application software to launch WPS's application software.

Application software will search for WPS connected to local area network when it starts, WPS's device name will be displayed at 'Server IP' field:

Please input a unique user name (used to identify each WPS user and should not be the same as other users) in 'User Name' field, and input the login code as shown on WPS's Instruction page. *When you're ready, click 'OK' button to continue.*

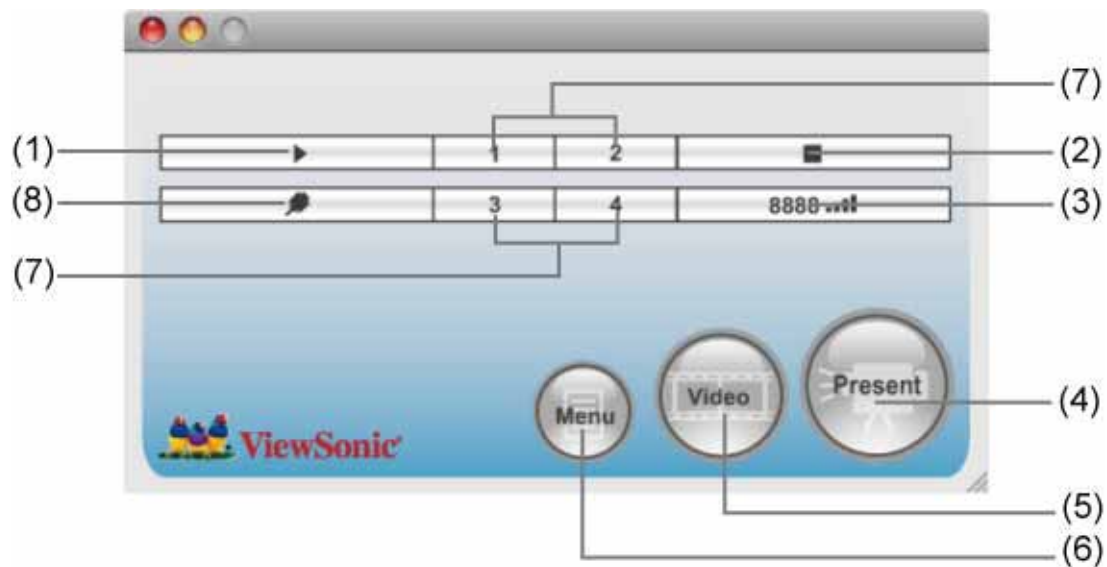

Application software will use your computer's name as user name. You can use this name, or input any user name in 'User Name' field, and input the login code as shown on WPS's Instruction page. *When you're ready, click 'OK' button to continue.*

Login code must match with the one display on WPS's Instruction page, else following message would appear. Click "OK" to enter the login code again.

#### 4-2-1 Use icon on application software

No.	Name	Function Description
1	Play / Pause	Start / pause presentation. When pausing a progressing presentation, the displaying image will freeze; press play button again to resume
2	Stop	Stop a progressing presentation
3	Login code / Signal	Displays login code (4-digit number) and wireless signal strength
4	Present	Switches to present mode
5	Video playback	Starts video playback mode

6	Menu	Access menu list				
7	‘1’ to ‘4’	<p>Quarter split display control. Click number 1 to 4 to start / stop presentation of corresponding quarter split display area.</p> <table><tr><td>1</td><td>2</td></tr><tr><td>3</td><td>4</td></tr></table>	1	2	3	4
1	2					
3	4					
8	VGA Switch	Switch display source (display the image from your computer’s display or from ‘VGA IN’ connector)				

#### 4-2-2 Menu List

Besides the buttons, you can also click 'Menu' button to access menu list.

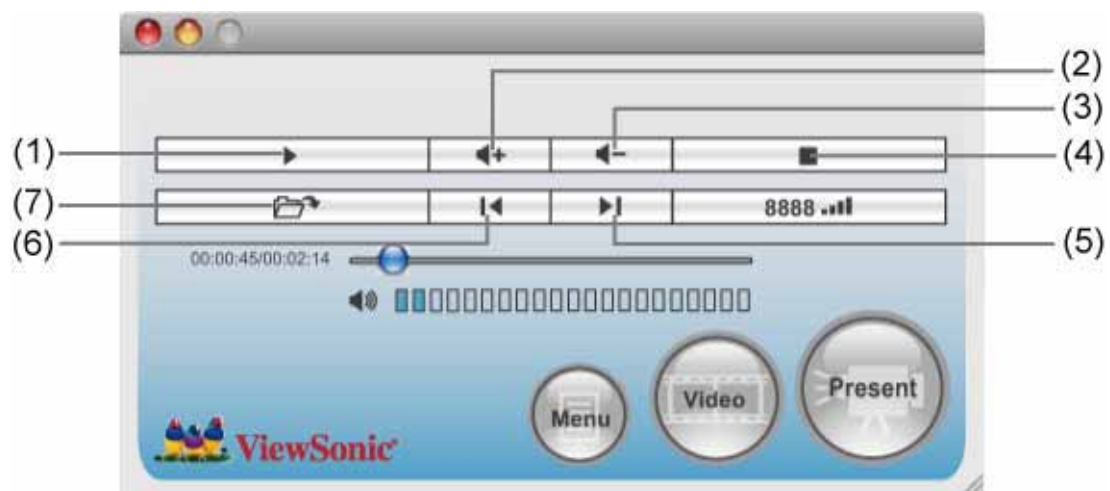

(NO MAC SW\*\*)

Item Name	Function Description
Administrator	Go to 'ADMIN' page of web menu

Open File	Open a video file for video playback (in video playback mode)
Status	<p>System / IP Address: check the system status and the IP address of WPS.</p> <p>Signal Status: check the status of wireless connection.</p> <p>About: check the version of application software:</p>
Control	<p>VGA1: Displays your computer's display content on projector</p> <p>VGA2: Display 'VGA IN' port's display content on projector</p> <p>Search**: Automatically select an active content source</p> <p>The content source being used currently will have a check mark in front of it.</p>
Power Off / Log Out	Stop using application software and logout.
Play / Projection	<p>Play: start presentation</p> <p>Pause: stop presentation</p> <p>Stop: stop a progressing presentation</p> <p>Blank: blank displaying image (all black)</p> <p>Repeat: Repeat video playback (in video playback mode)</p> <p>Minimize: minimizes application software</p>
Display	<p>Display: Show the name / SSID of WPS.</p> <p>Change resolution: changes display resolution and you can click "<b>Follow Desktop</b>" to equivalent to output based on original user desktop resolution setting.</p> <p>The resolution being used currently will have a check mark in front of it.</p>
Exit	Close menu list

### 4-3 Video playback

When you click 'Video' button in application software, the user interface will change and look as follow:

No.	Description
1	Playback / Pause
2	Volume up
3	Volume down
4	Stop video play
5	Fast forward (for 10 seconds)
6	Rewind (for 10 seconds)
7	Open video file

To start video playback:

1. Click 'Video' button
2. Click (7)  to open video file.
3. Video will start playing automatically.
4. Click (4)  to stop playing video.

#### 4-4 Quarter Split Screen (MAC Version)

When there is more than one presenter, you can use this function to display up to 4 presenter's content to present on display screen simultaneously.

To use Quarter Split Function, please login to WPS, and select a key (1 to 4) to present:

	<p>Number 1 to 4 correspond to different area of display screen:</p> <table border="1" data-bbox="858 790 1169 976"><tr><td>1</td><td>2</td></tr><tr><td>3</td><td>4</td></tr></table> <p>When you click a number, your content will be displayed in corresponding Quarter-Split display area</p>	1	2	3	4
1	2				
3	4				

To show content in full-screen mode, simply click 'Play' button; to resume to Quarter-Split display, simply click number key 1 to 4.

**NOTE: When 'Presentation Lock' is checked, no one will be able to interrupt a progressing presentation.**

**Projection Settings**

You can adjust the screen resolution

Instruction Page Language Selection: English

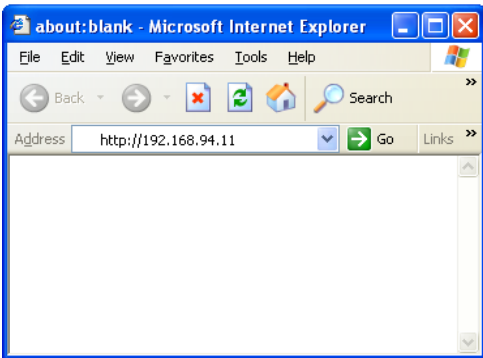

Output Resolution: 1024x768

☐ Presentation Lock

# Chapter V Configure **WPS**

## 5-1 Conference Control

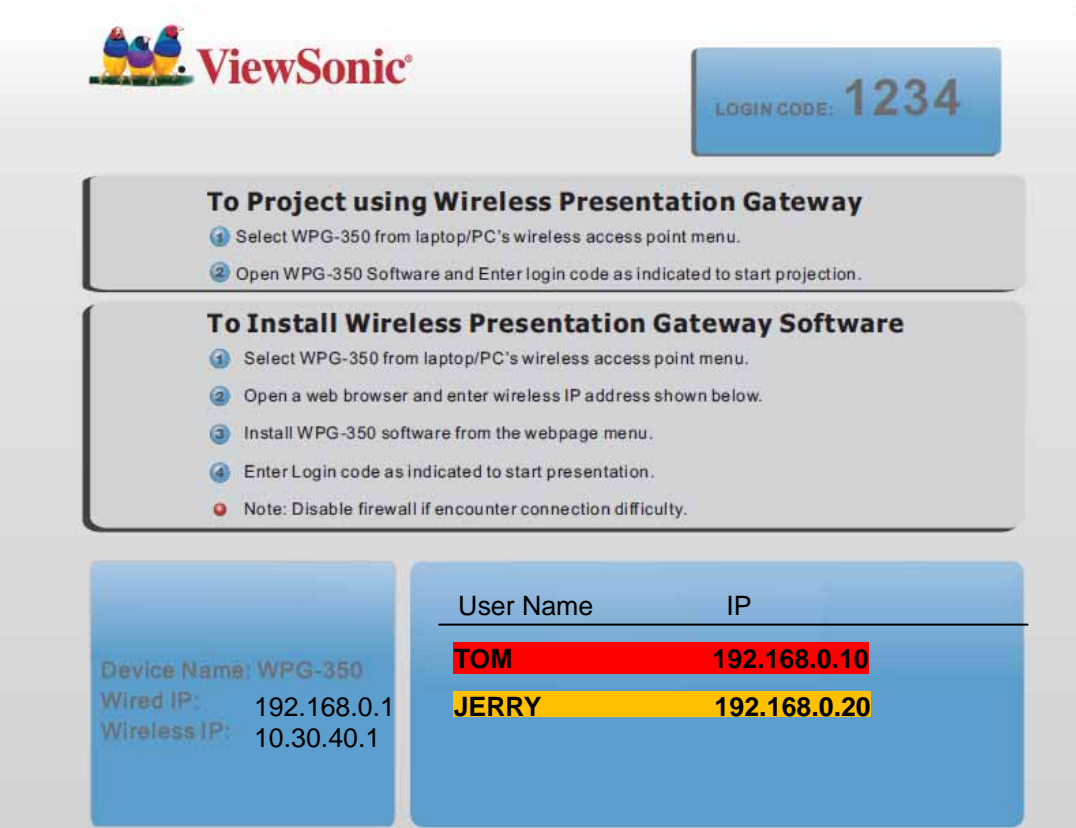

When there is more than one presentation login to WPS, you can control the content from different presenter via Conference Control webpage.

	Use the web browser to connect to the IP address of WPS (Wireless / Wired IP address). WPS's IP address can be found at the lower-left corner of Instruction page (refer to chapter 2-1).																				
	Click 'Conference Control' from WPS's web user interface.																				
 <table><tr><th colspan="5">User list :</th></tr><tr><th>Action</th><th>Name</th><th>IP Address</th><th>Status</th><th>Connection time</th></tr><tr><td> 1 2 3 4</td><td>User 1</td><td>192.168.2.59</td><td>Queued</td><td>00:00:42</td></tr><tr><td> 1 2 3 4</td><td>User 2</td><td>192.168.2.51</td><td>Queued</td><td>00:00:29</td></tr></table>	User list :					Action	Name	IP Address	Status	Connection time	1 2 3 4	User 1	192.168.2.59	Queued	00:00:42	1 2 3 4	User 2	192.168.2.51	Queued	00:00:29	All users currently logged in will be displayed here. To select a user's display content in certain area of Quarter-Split Display, click number 1 to 4; to display in full-screen, click  button on the
User list :																					
Action	Name	IP Address	Status	Connection time																	
1 2 3 4	User 1	192.168.2.59	Queued	00:00:42																	
1 2 3 4	User 2	192.168.2.51	Queued	00:00:29																	

	presenting user. To stop a progressing presentation, click
--	--

To select user by remote controller:

When there is more than one connected application software, you can also use remote controller to select one of them to display the content (same as 'Conference control' function described in last chapter). Press 'Login' button on remote control.

The screenshot shows the ViewSonic WPG-350 web configuration interface. At the top left is the ViewSonic logo. At the top right, a blue box displays 'LOGIN CODE: 1234'. Below this, there are two main sections with instructions:

- To Project using Wireless Presentation Gateway**
  - 1 Select WPG-350 from laptop/PC's wireless access point menu.
  - 2 Open WPG-350 Software and Enter login code as indicated to start projection.
- To Install Wireless Presentation Gateway Software**
  - 1 Select WPG-350 from laptop/PC's wireless access point menu.
  - 2 Open a web browser and enter wireless IP address shown below.
  - 3 Install WPG-350 software from the webpage menu.
  - 4 Enter Login code as indicated to start presentation.

Note: Disable firewall if encounter connection difficulty.

At the bottom, there are two blue boxes. The left box contains device information:

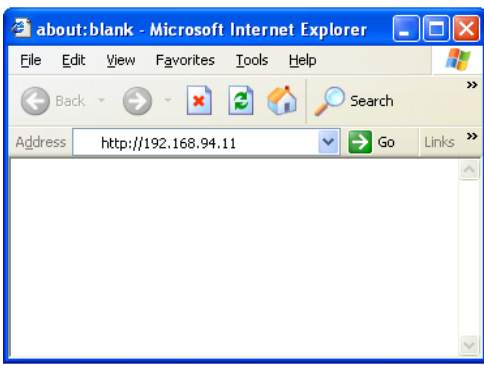

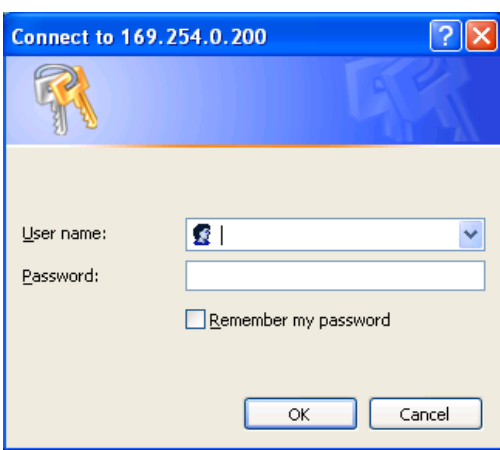

Device Name: WPG-350  
Wired IP: 192.168.0.1  
Wireless IP: 10.30.40.1

The right box contains a table of connected users:

User Name	IP
TOM	192.168.0.10
JERRY	192.168.0.20

You can use 'Prev.' and 'Next' button on the remote controller to move the bar, then click ► button to select the presenting user.

## 5-2 Connect to Web Configuration Menu

	<p>Use the web browser to connect to the IP address of WPS (Wireless / Wired IP address). WPS's IP address can be found at the lower-left corner of Instruction page (refer to chapter 2-1).</p>
	<p>Click 'Administrator Login' link on the left.</p>
	<p>Please input 'admin' as username. For 1<sup>st</sup> time login you don't have to input password, just click 'OK' to continue. You can change password after login.</p> <p>If you set password before, please input password in 'Password' field.</p>

### 5-3 Status & Info

Displays system information, like system software version and IP address. Many useful information can be obtained here when you need help about system configuration and firmware upgrade.

### 5-4 Network Settings

Displays and configures the network settings.

☒ Obtain an IP address automatically

☐ Use the following IP address

IP address	<input type="text" value="192.168.0.88"/>
Subnet Mask	<input type="text" value="255.255.248.0"/>
Gateway address	<input type="text" value="192.168.2.8"/>

• DNS Server

DNS address	<input type="text"/>
Secondary DNS Address (optional)	<input type="text"/>

Item	Description
Obtain an IP address automatically	WPS will obtain an IP address from DHCP server automatically.
Use the following IP address	Set WPS IP address manually. Fill the fields below to setup IP address.

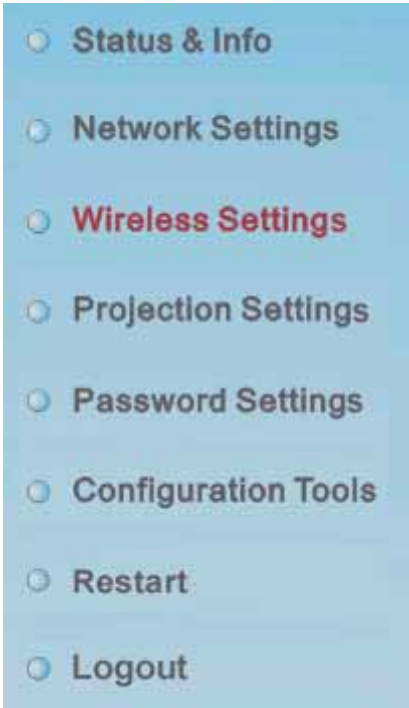

DNS Server	Please input the IP address of the DNS (Domain Name Service) server.
------------	--

Click 'Apply' button to save the settings.

NOTE: When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking "Restart" on the web configuration menu.

5-5 Wireless Settings

Configures wireless network settings.

5-5-1 ‘Basic’ Settings

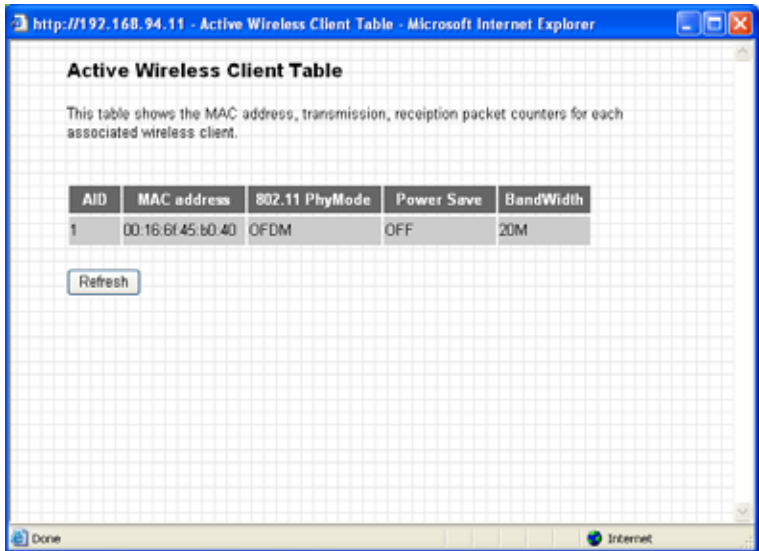

BasicAdvancedSecurityWPS

### Wireless Settings

This page allows you to define Device Name (SSID), and Channel for the wireless connection. These parameters are used for the wireless stations to connect to the Access Point.

Wireless Function :	Enable
Mode:	AP
Band:	2.4 GHz (B+G+N)
Device Name (SSID):	WPG-350
Channel Number:	11
Associated Clients:	Show Active Clients

Displays and configures the wireless settings.

Item	Description
Wireless Function	Select 'Enable' to enable wireless network function; 'Disable' to disable it.
Mode	Select wireless mode. Only AP (Access Point) mode is supported.
Band	Select the wireless band. Available options are:  2.4GHz (B) - 802.11b clients only. 2.4GHz (N) - 802.11 Draft-n clients only. 2.4GHz (B+G) - 802.11b and 802.11n clients. 2.4GHz (G) - 802.11g clients only. 2.4GHz (B+G+N) - 802.11b, 802.11g, and 802.11n clients.
Device Name (SSID)	Input the Device Name of presentation gateway here. Default is 'WP-S1201'.
Channel Number	Select the wireless channel number: 1 to 13. (1 to 11 in certain version of product)
Associated Client	<p>Shows all connected wireless clients (wired clients will not be displayed here).</p>  <p>Click 'Refresh' button to reload list.</p>

Click 'Apply' button to save the settings.

NOTE: When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking “Restart” on the web configuration menu.

### 5-5-2 ‘Advanced’ Settings

Fragment Threshold:	<input type="text" value="2346"/>	(256-2346)
RTS Threshold:	<input type="text" value="2347"/>	(0-2347)
Beacon Interval:	<input type="text" value="100"/>	(20- 1024 ms)
DTIM Period:	<input type="text" value="3"/>	(1-10)
Data Rate:	Auto <input type="button" value="v"/>	
N Data Rate:	Auto <input type="button" value="v"/>	
Channel Width:	<input checked="" type="radio"/> Auto 20/40 MHZ <input type="radio"/> 20 MHZ	
Preamble Type:	<input checked="" type="radio"/> Short Preamble <input type="radio"/> Long Preamble	
Broadcast Essid:	<input checked="" type="radio"/> Enable <input type="radio"/> Disable	
CTS Protect:	<input type="radio"/> Auto <input type="radio"/> Always <input checked="" type="radio"/> None	
Tx Power:	<input type="text" value="100 %"/> <input type="button" value="v"/>	
WMM:	<input type="radio"/> Enable <input checked="" type="radio"/> Disable	

Display and configures the advanced settings.

Item	Description
Fragment Threshold	Set the Fragment threshold of wireless radio. <b>Default value is 2346.</b>
RTS Threshold	Set the RTS threshold of wireless radio. <b>Default value is 2347.</b>
Beacon Interval	Set the beacon interval of wireless radio. <b>Default value is 100.</b>
DTIM Period	Set the DTIM period of wireless radio. <b>Default value is 3.</b>
Data Rate	Change data transfer rate. <b>Default value is ‘Auto’</b> and

	it's recommended to use default setting.
N Data Rate	Same as above, but only for 802.11n clients.
Channel Width	Set channel width of wireless radio. <b>Default setting is 'Auto 20/40 MHz'.</b>
Preamble Type	Set the type of preamble of wireless radio, <b>Default setting is 'Short Preamble'.</b>
Broadcast Device Name (SSID)	Decide if the product will broadcast its own device name or not. You can hide the device name of this product (set the option to 'Disable')
CTS Protect	Enable to reduce the chance of radio signal collisions between 802.11b and 802.11g wireless access points. It's recommended to set this option to 'Auto' or 'Always'.
Tx Power	You can set the output power of wireless radio.
Turbo Mode	Enhances the data transfer rate of network. Default setting is "Enable".
WMM	Wi-Fi MultiMedia Quality of Service is a set of features for Wi-Fi networks that improve the user experience for audio, video, and voice applications by prioritizing data traffic. Default setting is "Disable".

Click 'Apply' button to save the settings.

NOTE: When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking "Restart" on the main menu.

### ***5-5-3 'Security' Settings***

#### ***5-5-3-1 Encryption: Disabled***

Disables wireless encryption. Other people may intercept the content of presentation if wireless data is not encrypted, and this will allow everyone to connect to this product, unless 802.1x authentication is enabled.

Encryption :	Disable
<input checked="" type="checkbox"/> Enable 802.1x Authentication	
RADIUS Server IP address :	
RADIUS Server Port :	1812
RADIUS Server Password :	

Display and configures the encryption settings.

Item	Description
Enable 802.1x Authentication	Check this box to enable 802.1x authentication.
RADIUS Server IP address	IP address of RADIUS authentication server here.
RADIUS Server Port	Port number of radius server here.
RADIUS Server Password	Password of radius server.

Click 'Apply' button to save the settings.

NOTE: When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking "Restart" on the main menu.

### ***5-5-3-2 Encryption: WEP***

Enable WEP encryption. Wireless clients must support WEP encryption and know the encryption key you set here.

Encryption :	WEP
Key Length :	64-bit
Key Format :	Hex (10 characters)
Default Tx Key :	Key 1
Encryption Key 1 :	*****
Encryption Key 2 :	*****
Encryption Key 3 :	*****
Encryption Key 4 :	*****
<input checked="" type="checkbox"/> Enable 802.1x Authentication	
RADIUS Server IP address :	
RADIUS Server Port :	1812
RADIUS Server Password :	
<div>Apply</div> <div>Cancel</div>	

Display and configures the encryption settings.

Item	Description
Key Length	Select WEP key length (64 bit or 128 bit), longer WEP key provides better security. Recommend to select '128-bit' for better security.
Key Format	Select key format: ASCII or Hex.  ASCII: 5 characters (64 bit key length) / 13 characters (128 bit key length) HEX: 10 characters (64 bit key length) / 26 characters (128 bit key length)
Default Tx Key	You can set up to four sets of WEP key and decide which key is being used by default here. Default setting is '1'
Encryption Key 1 to 4	Input WEP key characters here. Use any alphanumerical characters (0-9, a-z, and A-Z) if you select 'ASCII' key format, and use characters 0-9, a-f, and A-F for HEX
Enable 802.1x Authentication	Enables 802.1x authentication. You don't have to check this box if you don't have 802.1x authentication server.
RADIUS Server IP	IP address of RADIUS authentication server.

address	
RADIUS Server Port	Port number of radius server, from 1 to 65535. Default setting is 1812.
RADIUS Server Password	Password of radius server, up to 64 characters.

Click 'Apply' button to save the settings.

NOTE: When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking "Restart" on the main menu.

### 5-5-3-3 Encryption: WPA pre-shared key

Enable WEP encryption. Wireless clients must support WPA encryption and know the encryption passphrase you set here.

Display and configures the encryption settings.

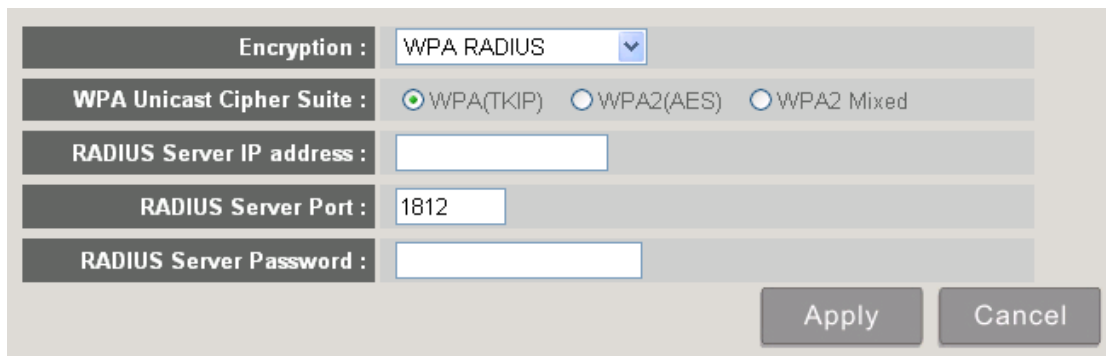

Item	Description
WPA Unicast Cipher Suite	Select the type of WPA cipher suite. Select 'WPA (TKIP)' for maximum compatibility and WPA2 (AES) / WPA2 Mixed for better security.
Pre-shared Key Format	Select the type of pre-shared key: Passphrase or HEX characters.
Pre-shared Key	Input WPA Passphrase here. Passphrase: 8 or more alphanumerical characters, up to 63 characters Hex: 64 characters (0-9, a-f, and A-F)

Click 'Apply' button to save the settings.

NOTE: When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking "Restart" on the main menu.

#### ***5-5-3-4 Encryption: WPA RADIUS***

Enable WPA encryption with RADIUS authentication support. The client must support WPA encryption and you need to provide the setting of RADIUS server here.

Display and configures the encryption settings.

Item	Description
WPA Unicast Cipher Suite	Select the type of WPA cipher suite. Select 'WPA (TKIP)' for maximum compatibility and WPA2 (AES) / WPA2 Mixed for better security.
RADIUS Server IP address	IP address of your Radius authentication server.
RADIUS Server Port	Port number of your Radius authentication server. Default setting is 1812.
RADIUS Server Password	Password of your Radius authentication.

Click 'Apply' button to save the settings.

NOTE: When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking "Restart" on the main menu.

### 5-5-4 'WPS' Settings

In this menu, you can use WPS (Wi-Fi Protected Setup) to setup secure wireless connections quickly and easily with WPS-compatible wireless clients.

☒ **Enable WPS**

- Wi-Fi Protected Setup Information**

<b>WPS Status:</b>	Configured
<b>Self PinCode:</b>	0
<b>Device Name (SSID)</b>	WPG-350
<b>Authentication Mode</b>	Disable
<b>Passphrase Key</b>	
- Device Configure**

<b>Config Mode:</b>	Registrar	
<b>Configure via Push Button:</b>	Start PBC	
<b>Configure via Client PinCode:</b>		Start PIN

Display and configures the WPS setting.

Item	Description
Enable WPS	Check this box to enable WPS functionality; uncheck to disable WPS.
WPS Status	Displays WPS configuration status: Configured (WPS ready), or Unconfigured. If you set wireless security as described in previous section already, WPS status will be 'Configured'.
Self PinCode	Displays WPS self pin code. This code will be used when pin-style WPS pairing mode is being used, and WPS wireless clients will need to know this code.
Device Name (SSID)	Displays the device name of this WPS.
Authentication Mode	Displays current wireless authentication mode.
Passphrase Key	Here uses asterisk mark ( * ) to show WPA passphrase key.
Config Mode	Select WPS configuration mode: 'Registrar' and

	'Enrollee'. Default and recommend setting: Registrar.
Configure via Push Button	<p>Click "Start PBC" to handshake with other device with WPS function.</p> <p>NOTE 1: When WPS is in 'Registrar mode', another wireless device must set to 'Enrollee' mode; and vice versa.</p> <p>NOTE 2: When no WPS connection is established within 2 minutes, this mode will be turned off.</p> <p>NOTE 3: You can also press 'WPS' button located on the front of wireless projector server to enter WPS mode, too.</p>
Configure via Client PinCode	Input the PIN code (up to 8 characters) of the WPS-enabled device here, then click 'Start PIN' button, then WPS will establish connection with it automatically.

5-6 Projection Setting

Displays and configures the projection setting.

Instruction Page  
Language Selection

English

Output Resolution

1024x768

☐ Presentation Lock

Item	Description
Instruction Page Language Selection	Select the displaying language.
Resolution	Select output resolution for projection.
Presentation lock	Check this box to prevent other users to interrupt current presentation.

Click 'Apply' button to save the settings.

NOTE: When the configuration settings are changed, you must restart the

network connection. You can restart the network connection by clicking “Restart” on the main menu.

5-7 Password Setting

Displays and configures the password setting.

Current Password	<input type="password"/>
New Password	<input type="password"/>
Confirmed Password	<input type="password"/>

Item	Description
Current Password	Input current password here.
New Password / Confirmed Password	New Password: Enter new password. Confirmed Password: Confirmed the new entered password.

Click ‘Apply’ button to save the settings.

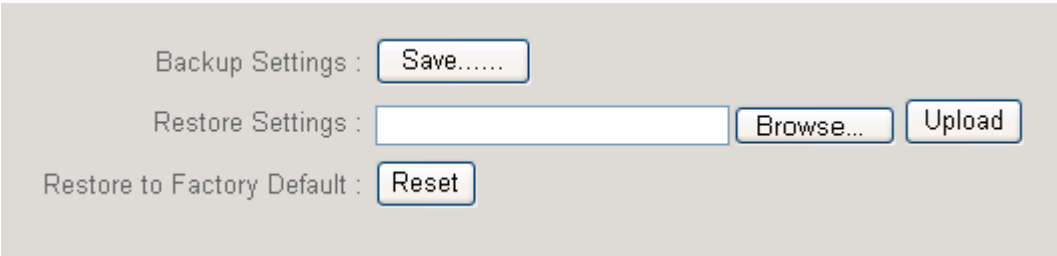

NOTE: When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking “Restart” on the main menu.

5-8 Configuration Tools

5-8-1 Configuration Tools

Allows you to backup / restore the setting of WPS.

Displays and configures the configuration tools.

Item	Description
------	-------------

Backup Settings	Click 'Save...' button to save wireless projector server's current setting as a file and store it on your computer.
Restore Settings	Click 'Browse...' button to select a previously-saved configuration file stored in your computer's folder.
Reset	Reset all settings of wireless projector server back to factory default settings.

### ***5-8-2 Firmware Upgrade***

Upgrade the firmware of this WPS.

If WPS connects to Internet and you wish it to upgrade firmware automatically, select 'Auto'; WPS will download latest firmware and upgrade automatically. When you set this setting to 'Manual', WPS will detect new firmware on Internet automatically, and you'll see a prompt message on OSD menu. If you wish to upgrade firmware, you can click 'Check Now' button to proceed.

***Note: it's recommended to use wired Ethernet connection to perform firmware upgrade.***

When firmware is upgrading, you'll see the following message:

**ViewSonic®**

LOGIN CODE: **1234**

**To Project using Wireless Presentation Gateway**

- 1 Select WPG-350 from laptop/PC's wireless access point menu.
- 2 Open WPG-350 Software and Enter login code as indicated to start projection.

**To Install Wireless Presentation Gateway Software**

- 1 Select WPG-350 from laptop/PC's wireless access point menu.
- 2 Open a web browser and enter the IP address of the WPG-350.
- 3 Install WPG-350 Software.
- 4 Enter Login Code.

Note: Disable firewall if encounter connection difficulty.

**Upgrading.....**

**Device Name: WPG-350**  
**Wired IP: 169.254.0.200**  
**Wireless IP: 10.30.40.1**

User Name	IP
-----------	----

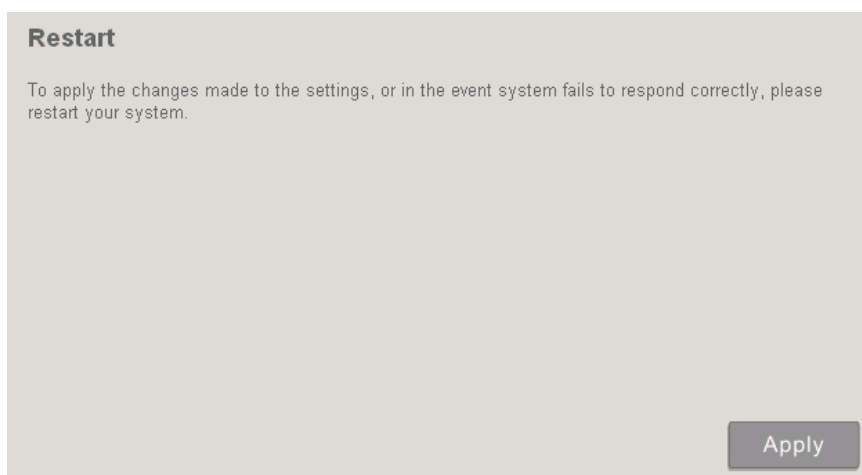

WPS will restart automatically after upgrade is complete, please be patient.

## 5-9 Restart

Restart WPS when the device is not working properly or to apply changes made on web configuration menu.

Note: Restart takes about 60 seconds.

Click 'Apply' to restart the WPS

(PC)

(MAC)

Click 'OK' to restart the WPS, or click 'Cancel' to abort.

## 5-10 Logout

If you wish to logout from web configuration menu, click 'Logout'.

## Chapter VI Appendix

### 6-1 Hardware Specification

Product name	WP-S1201
Power Supply	External power supply (12V DC, 1A)
Dimensions	133.4 x 92.4 x 31.08mm
Weight	200g
Connectivity	VGA Connector : VGA OUT ----- D-sub 15 pin mini x 1(Black) x 1 PC IN -----D-sub 15 pin mini x1(Blue) x 1  Audio Output Interface: 3.5mm jack x 1  Wired Network Interface : 10/100Mbps auto-sensing/auto-cross-over Ethernet port x 1  Wireless Network Interface : Built-in 802.11b/g/n
Output Resolution	1024 x 768, 800x600
Environmental Requirements	Operating Temperature: 0 ~ 40°C Operating Humidity: 5 ~ 85%, non-condensing Storage Temperature: 0 ~ 50°C Storage Humidity: 5 ~ 85%, non-condensing
Operating System	Supported OS : 1. Windows XP 32/63-bit (SP2 or higher) 2. Windows Vista 32/63-bit (SP1 or higher) 3. MAC OS 10.4 / 10.5 (Both Power PC / Intel Version)  Supported Web browsers : 1. Microsoft Internet Explorer 6.0 (SP2) or higher 2. Mozilla's Firefox 3.0 or later 3. Safari
Approvals	CE, FCC, IC, UL/cUL, NCC, C-TICK, RoHS-compliant
Software	wireless projector server software application
Support Video Format	H.261 H.263 MPEG1 WMV7 (supported by calling dlls provide by WMP10)

Support Audio Format

WMV8 (supported by calling dlls provide by WMP10)  
MPEG4 (Used Xvid codec to Support Mpeg4 Part 2  
Advanced Simple Profile)  
Microsoft MPEG-4 v1/v2(supported by calling dlls provide by  
WMP10)  
PCM  
ADPCM  
WMVA1 (supported by calling dlls provide by WMP10)  
WMVA2 (supported by calling dlls provide by WMP10)  
\*\*Not support AAC and MP3\*\*

## 6-2 Troubleshooting

Scenario: Can't connect to wireless projector server

Solution:

1. Check the LED lights located at the front of WPS. If 'Power' LED does not light, do the following check:

- Check the connection of A/C adapter, and if the electrical outlet you used with A/C adapter is functioning properly.
- Press 'Power' button on remote controller to see if 'Power' LED lights now.

2. Check the network connection.

3. Make sure you connected to correct IP address.

4. If you're using wireless network, make sure you connected to correct device.

5. If you're using wireless network, check the WEP / WPA password.

Scenario: Remote controller does not work

Solution: 1. Replace the battery of remote controller with a new one (CR-2032 lithium battery).

2. Please point the IR transmitter (located at the top of remote controller) to the IR receiver of WPS.

3. Make sure the IR receiver of WPS (labeled as 'Remote') is not blocked by any object.

4. If there's strong / fluorescent light source near IR transmitter / receiver, remote controller may not be able to function properly.

5. If the distance between IR transmitter / receiver is longer than 7 meters, remote controller may not working properly.

6. Make sure the IR extending cable is correctly inserted to 'IR IN' jack at the back of WPS, not 'AUDIO OUT' jack.

Scenario: No image displayed on WPS's display

Solution:

1. Check the connection between video display and WPS.
2. Make sure the video display you're using supports the video output mode you selected (in VGA mode).
3. Make sure the video display is switched on.

Scenario: I hear noise when WPS is operating.

Solution: If you smell something strange or even see smoke come out from WPS, unplug the A/C adapter (if possible), and return the WPS back to dealer of purchase immediately.
