

## Description of Operation

FCCID: NDPM1POS

EUT is operating in the 2.4GHz ISM (Industrial Scientific Medicine) band. In a vast majority of countries around the world the range of this frequency band is 2400-2483.5 MHz. Within the ISM band, this device transmissions hop between 79 separate frequencies 1600 times every second. Channel spacing is 1MHz. The Modulation is GFSK (Gaussian Frequency shift keying) with a BT=0.5. The Modulation index must be between 0.28 and 0.35. The antenna is multiplayer ceramic antenna, and there is no antenna connector.

The device includes both RX and TX part. The device is a Bluetooth device developed with Bluetooth technology, which audio signal can via TX part transmit to RX part.
