Motomu,

I have given your application a quick overview and have the following comments:

- 1.) The internal and external photographs were supplied as a single file. This is not correct. Please reassemble as External Photos, and Internal Photos.
- 2.) Test Setup photos (Appendix 1:), both Radiated and AC conducted (if applicable), must be broken out as a separate document.
- 3.) The Operational Description is stamped confidential, but not listed as Confidential in the confidential request letter. Please address with your client. Please also note that in general, Operational Descriptions are not given Confidentiality status without more justification than supplied in the application.
- 4.) Has this device been tested as a Part 15, Subpart B computer peripheral? If so, evidence of a Declaration of Conformity or Class B Certification would be appropriate.
- 5.) The address information for Grantee code NEE is different from that listed on the FCC database (see below). This will have to be corrected directly with the FCC. Please have your client provide current contact information on their letterhead to Bette Taube at FCC.
