Limited module approval applies only to Part 15 transmitters, instead you should use this policy.

Licensed Modular Transmitters

Licensed transmitters may be approved as modules for installation into other, final devices provided the following criteria are met:

The final device is designed for mobile or fixed operation (Portable is not permitted – Reference TCB Exclusion List (17 July 2002) II(g)).

The maximum antenna gain to allow compliance with RF exposure requirements is listed on the Grant of Certification for the module

The licensed module must have a FCC ID label on the module itself. That FCC ID label must be visible through a window on the final device or it must be visible when an access panel, door or cover is easily removed. If not, a second label must be placed on the outside of the final device that contains the following text:

Contains "FCC ID: xxxyyyzzz"

The Grant should include the following words in the device description or grant notes: "modular transmitter" or "transmitter module"

Today's Date: December 3, 2002

Effective Date: Immediately
