**RE: FCC Class II change**  
FCC ID: NEO80-3014SERIES

We request a change to the power levels per carrier started on the grant for the different frequency bands.

Our original submission was based on the specified power requirements for the system the equipment was being built for.

Our end customer has asked that we the grant to reflect the actual capabilities of the equipment as supported by the test reports.

Thank you for your attention to these matters.

Yours faithfully

For and on behalf of  
Axell Wireless

Peter L Bradfield  
Senior Systems Engineer
