

19.3.2007

Justification letter.

To whom it may concern,

Please notice that the booster under FCC ID:NEODSBR4008PSB and booster under FCC ID:NEODSBR4008PSA have the same hardware and software and only difference is in their passband definition , i.e. up to 75Khz for Class A and exceeds 75Khz for Class B.

These Class A and Class B boosters share the same frequency range, 806 Mhz-817 Mhz & 851 Mhz-862 Mhz.

Please notice that we take full responsibility that these tests represents the compliance for the new FCC ID:NEODSBR4008PSA.

Also, Class A boosters and Class B boosters cannot be combined in a single booster.

Sincerely.

Raviv Cohen.

Cobham wireless.
