FCC C2PC / ISED C3PC Permissive change letter

To whom it may concern,

We are applying for certification of the below described changes to the following existing certifications:

FCC-ID: NF3-NRCS2P, initial grant data: 07/08/2020
IC: 3887A-NRCS2P, approval date: 07/07/2020

Class 2 Permissive Change rules according to FCC §2.1043 (b)(2) and ISED
Class 3 Permissive Change rules according to ISED RSP-100, issue 12,
section 10.

The purpose of this application is to reduce the radio modules RF output power by 1dB for all modes and used frequencies. Additionally, a change in firmware is implemented for the module to comply to receiver blocking characteristics in alignment to requirements from other countries.

Yours sincerely

Robert Bosch GmbH
