

1.2. Operation Description

The EUT is Video Sender. The operation frequency is from 2401.9202MHz to 2479.68MHz with GFSK modulation. Eight manually selectable channels were built in the EUT. the signal will be transmitted through 2.4 GHz GFSK RF signal from the soldered on PCB antenna from EUT to receiver. DC 3.3V shall be provided for Module approve operation.
