

## **1.2. Operation Description**

The EUT is 5.8GHz Video Sender. The operation frequency is from 5730 MHz to 5870 MHz with FM modulation. Two manually selectable channels were built in the EUT. The signal will be transmitted through 5730 MHz or 5870 MHz FM RF signal from the soldered on PCB antenna from EUT to receiver. DC 9V shall be provided for EUT operation.
