Dear Steve

About the Channel description in manual, our meaning is as below:

When you get the product which domain is FCC that you could choose the channel in 1~11.

When you get the product which domain is ETSI that you could choose the channel in 1~13.

When you get the product which domain is MKK that you could choose the channel in 1~14.

We don't provide the function for customers to choose different domain by themselves.

Thanks for your assistance!

Best Regards  
Wendy Liao

TCB Review Comments for (A05-0930a- NHPWLG1501, 940624L04)

-EMC-

Question #1: P11 of user manual has following statement, please confirm if regulatory domain selection is available to the end user.

**Channel:** The value of channel that AP will operate in. You can select the channel range of 1 to 11 for North America (FCC) domain and 1 to 13 for European (ETSI) domain and 1 to 14 for Japanese domain.
