Dear Steve

About the Channel description in manual, our meaning is as below:

When you get the sample which domain is FCC that you could choose the channel in 1~11.

When you get the sample which domain is ETSI that you could choose the channel in 1~13.

When you get the sample which domain is MKK that you could choose the channel in 1~14.

We don't provide the function for customers to choose different domain by themselves.

If you still have any problem, pls feel free to let me know.

Thanks for your assistance!

Best Regards

Wendy Liao

11g

AP

Dear Wendy,

The manual Page 12 show following info:

Channel: The channel that AP will operate in. User can select the channel range from 1 to 11 for North America (FCC) domain, 1 to 13 for European (ETSI) domain and 1 to 14 for Japanese domain.

Please confirm if there is any utility or function that end-user can use to select the different domain.

Best regards,

Steve Cheng
