Dear Dennis,

Thank you very much for your contact on the above application. I make a reply as follow.

1. As for the Schematics and Label drawing & location, I re-uploaded them through your website. Please check them. As for the testreport, we think this file doesn't contain non-English fonts because we can open this file and see all pages by our English acrobat. Could you check this again?

If there is any pages of non-English fonts, please let me know the applicable pages.

2. We uploaded the revised Internal photos. Please check it.

3. Since the modulation of the Hand Unit <NHVWBU61> is FSK <Frequency shift keying, we observed the waveform as the submitted testreport. However, since we wrote only Frequency on the page 3, we modified "Frequency" to "Frequency shift keying". Please replace original page 3 to "revise Page 3".

4. We added the applicable data and uploaded it. Please see the "add A3-1".

Thanks.

Best regards,

Yukie Koyama
