

Operational Description

This device is a 802.11G USB2.0 ADAPTER, the maximum data rate could be up to 54Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with CCK technique will be applied.

The design of the equipment cannot be plugged into a host (such as Laptop) directly. An USB cable is necessary to connect with both host and the equipment, Therefore, the equipment is a mobile device.

The transmitter of the EUT (802.11G USB2.0 ADAPTER) is powered from host equipment. The antenna used in this product is PCB Dipole antenna with UFL connector.

The other instruction, please have a look at the users manual.
