

A photograph of a laboratory setup. A wooden table holds a laptop in the center, a small red electronic device to its left, and a silver electronic device to its right. A white label with the text '900828R09' is placed on the table in front of the laptop. The background is a plain, light-colored wall with several electrical outlets and a power strip. On the floor, there are two large power supplies or battery packs, one on the left and one on the right, connected to the setup.

RADIATED EMISSION TEST
