FCC ID:NIRRC223

RF EXPOSURE EVALUATION.

The highest RF Output Power of the EUT at 2440 MHz was measured -3.3 dBm e.i.r.p., which is less than 20 mW.

Since maximum peak output power of the transmitter is $<60/f(\text{GHz})$ mW, i.e.

$60/2.450 = 24.49$ mW

$0.47 \text{ mW} < 24.49 \text{ mW}$, hence the EUT is excluded from SAR evaluation according to FCC KDB publication 447498 D01: Mobile Portable RF Exposure.
