

SPORTON LAB

Response For FCC Application
2004/9/13

RE: SOLOMON Technology Corp.
FCC ID: NITSCWI311B

1. The operational description is updated to delete "hand-held device".
2. This photo is deleted
3. DoC statement is uploaded
4. The signal on plotting is PEAK, but the data QP. If the signal is not continuous type, the difference between QP and PEAK will be large.
5. The new RF exposure is updated in report section 9.
6. The old RF exposure is removed.

Sincerely Yours

Daniel Lee

EMC/SAR Manager
