

Warning label to be mounted on the CVDM-2000 for RF exposure guidelines:

CVDM-2000 is a board which is used with an antenna connected via a cable to its connector. It is not used as a handheld device to be held against one's ear. Antenna is to be at least 50 centimeters (20 inches) away from the body of the user or nearby persons. The following warning label will be mounted on all CVDM-2000 boards:

While this device is in operation, a separation distance of at least 50 centimeters (20 inches) is maintained between radiating antennae and the body of the user or nearby persons in order to meet the FCC RF exposure guidelines
